**Detailed Project Description and Justification:**

CBERRRSA maintained roads extend from Hiland to Eklutna totaling over 180 miles. Several miles are in mountainous areas with steep grades. Winter sand is stored at both the Hiland and Chugiak area storage facilities to reduce hauling costs and response times. Currently winter sand piles are stored outdoors and mixed with sand to prevent freezing. NPDES Permit includes a requirement to enclose winter sand piles to reduce the need for chlorides mixed into the sand. Chlorides leach from material storage facilities into wetlands. Construction of these winter sand storage buildings will ensure compliance with the federal stormwater permit requirements.
