**Brief Summary and Statement of Need:**

This is a Roads to Resources project. The access point from Nenana is true "low hanging fruit" because it is achievable within a shorter time frame and for less money than many other access points around the state. It provides access to approximately 900,000 acres of land with large agriculture potential, timber harvesting and oil and gas development as well as extension of access to Interior mineral development and potential for continuing on to Tanana and Nome.
