Additional Information / Prior Funding History:

The allocation "First Time Service Projects" was funded in FY2011 for \$29,100.0 and FY2012 for \$29,791.8.

Project Description/Justification:

The Facility Construction component within the Division of Water provides technical and financial support to Alaska's communities to design and construct drinking water and sanitation facilities. Communities apply each year to the State for grants for these projects. Applications are scored weighing primarily on the extent to which proposed projects address critical public health needs, as well as the communities' capacity to operate and maintain the facilities. High ranking projects are placed on a multi-year priority list, which identifies projects to receive funding over the next several years. The majority of project awards made under this program are eligible for grant funds made available to the state through the federal government. A portion of the federal grant monies available require the state to appropriate matching funds.

Each year communities propose more projects than the State has funding available. When projects are proposed, total costs are estimated based on the best information available but are subject to change. Balances in these projects may be shifted to augment other projects that were underestimated or, applied to other approved projects on the waiting list based on a first-ready, first-served basis.
