Brief Summary and Statement of Need:

During a high wind event in September of 2011, the antiquated dry storage shed sustained damages that have rendered the building unusable. The building was condemned by the Petersburg Maintenance and Operations Foreman and subsequently razed. The supplemental funding requested is to replace the structure with a new 60 x 40 square foot building. The supplies that were stored in the shed have been removed and placed in temporary winter storage, which consists of two 40 foot generator vans from Northland Services. A supplemental request is required to allow for the design and construction of the Petersburg Dry Storage building during the calendar year 2012 summer construction season.
