Aggregate Surfacing Materials

AP/AL: Allocation
Category: Transportation
Location: Statewide
Impact House District: Statewide (HD 1-40)
Estimated Project Dates: 07/01/2012 - 06/30/2017
Appropriation: Asset Management

Project Type: Construction
House District: Statewide (HD 1-40)
Contact: Pat Kemp
Contact Phone: (907)465-3900

Brief Summary and Statement of Need:
This project makes available crushed aggregate surfacing materials that can be used for maintenance on state-funded rural highways across the state. Doing this in conjunction with large federal-aid highway projects achieves significant savings. Surfacing materials will be a bid item in major projects on the Taylor, Elliott, Denali, Tok Cutoff, Steese, Glenn, Richardson, and Alaska Highways. This material is used as surface course on gravel roads and as cover coat in high float patches on asphalt highways.

Additional Information / Prior Funding History:
FY2009 - $1,000,000; FY2008 - $1,000,000; FY2007 - $1,250,000 for Glenn, Richardson, Teller and Tok Cutoff; FY2006 - $400,000 for Dalton, Glenn, Richardson and Tok Cutoff; FY2003 - $600,000 for Dalton, Glenn and Tok Cutoff; FY2002 - $500,000 for Dalton and Elliott

Project Description/Justification:
This project will fund the crushing and delivery of additional surfacing materials as part of existing construction contracts or as large multiple location contracts. Small materials contracts of 10,000 Cubic Yards (C.Y.) may average between $18-$20/C.Y for single site contracts, while larger orders created as part of a highway construction contract will cost between $10-$13/C.Y which would allow the department to realize a cost savings. These added materials will greatly improve the Department’s ability to repair the highways and address major dips, washouts, and permafrost heaving.

To efficiently maintain the highways, materials storage should be located every 40-60 miles along our highways. This will allow the Department to address permafrost degradation and maintenance needs without having to haul fill material long distances.
