Project Description/Justification:

Under the plan, staff will analyze Alaska crash data, determine what crash patterns are susceptible to cost-effective correction, implement countermeasures to correct those problems, and monitor the effectiveness of those countermeasures. This scope includes using a contractor to develop the update, evaluate strategies in the 2011 plan, coordinate key groups and provide guidance. This scope also includes developing evaluation methods to track performance (software & hardware included) and will fund crash data entry processing in order to deliver timely crash data for STSP purposes.

This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.
