

Northern Region - National Highway System and Non-National Highway System Pavement and Bridge Refurbishment

FY2013 Request: \$10,000,000
Reference No: 41700

AP/AL: Allocation

Project Type: Construction

Category: Transportation

Location: Statewide

House District: Statewide (HD 1-40)

Impact House District: Statewide (HD 1-40)

Contact: Pat Kemp

Estimated Project Dates: 07/01/2012 - 06/30/2019

Contact Phone: (907)465-3900

Appropriation: Surface Transportation Program

Brief Summary and Statement of Need:

Project includes crack sealing, surface treatment drainage, signage, guardrail, illumination and other refurbishments to prolong the life of road pavement and bridges and their safety related structures.

Funding:	FY2013	FY2014	FY2015	FY2016	FY2017	FY2018	Total
Fed Rcpts	\$10,000,000						\$10,000,000
Total:	\$10,000,000	\$0	\$0	\$0	\$0	\$0	\$10,000,000

Additional Information / Prior Funding History:

\$32,000,000 - Ch 5 FSSLA 2011 Sec 1 Pg 113 Ln 32; \$25,000,000 - Ch 43 SLA 2010 Sec 7 pg 49 In 18; \$23,000,000 - Ch 15 SLA 2009 Sec 1 pg 33 In 23; \$23,000,000 - Ch 29 SLA 2008 Sec 13 pg 170 In 11; \$9,000,000 - Ch 30 SLA 2007 Sec 4 pg 114 In 29; \$42,200,000 - Ch 82 SLA 2006 Sec 1 pg 99 In 22.

Project Description/Justification:

This is a federally-funded project that provides for preventive maintenance activities that demonstrate a cost-effective means of extending the useful life of a federal-aid highway. Preventive maintenance is a planned strategy of cost-effective treatments to an existing roadway system that preserves the system, retards future deterioration, and maintains or improves the functional condition of the system without significantly increasing structural capacity.

To meet the growing travel demand and the public's expectations for safety, ride quality, and traffic flow, highway agencies across the country are redefining their objectives to focus on activities and strategies to preserve and maintain existing highway systems, instead of the typical strategy of fixing the worst first. The proactive approach of preventive maintenance cuts the need for costly, time-consuming rehabilitation and reconstruction projects and reduces associated traffic disruptions. As a result, the public will see improved mobility, reduced congestion, and safer, smoother, longer-lasting pavements - the goals of preventive maintenance.

when it can be demonstrated that such activities are a cost-effective means of extending the pavement life. In general, any work which provides additional pavement structural capacity, prevents the intrusion of water into the pavement or pavement base, provides for removal of water that is in the pavement or pavement base, restores pavement rideability, or prevents the deterioration of bridges is considered to be work which extends the service life of the highway. The Alaska Department of Transportation and Public Facilities uses preventive maintenance funding to perform roadway activities such as chip sealing, pavement overlays, milling, profiling, and micro-surfacing; seal coats, joint seals, and crack seals; shoulder repair; restoration of drainage systems; and bridge activities such as deck rehabilitation or repair, deck drain cleaning, crack sealing, joint repair, seismic retrofit, scour countermeasures, and painting. Although specifically noting pavement and bridge preservation, this program also allows for the upgrading and replacement of existing drainage systems, guardrail, illumination, and other safety related structures. Highway striping is also funded under this program.

This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.
