Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:

None.

Project Description/Justification:

The HDP is the public's web portal to State road log information (functional classification, ownership, maintenance district, urban/rural boundaries, milepoints and cultural road feature data), real-time speed data and weigh in motion data. The HDP also includes crash data access for Department personnel only. The HDP must be continually upgraded to keep up with public and Department's access to public road data. Specific enhancements include better search tools, additional reports for accessing AADT, and expanding the crash data range up to 10 years.

This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.
