Project Description/Justification:

The auxiliary lane(s) will increase safety for traffic at the Denali National Park entrance. The existing bridge is structurally deficient with a sufficiency rating of 47.8. The existing bridge does not provide safe access for pedestrians. The parking area will provide a parking location away from the highway for visitors who access the Riley Creek Bridge.

This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.
