Additional Information / Prior Funding History:

None.

Project Description/Justification:

The existing fence only extends from the terminal along the areas of the airport that are easily accessed from roads. The purpose of the security fence is not solely to restrict access to people; it also helps to keep animals off the runway and taxiways where they are a hazard to aircraft and where they often cause damage to lights and other equipment. The project will also include repairs and improvements to the existing fence and gates, along with other related work. This project contributes to the Department's Mission by providing safe airports that meet users' needs.

This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.
