Add Special Project Assistant (10-#034) to Support Priority Oil and Gas Fiscal Reviews												
	PosAdj	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	1	0	0

The Department of Natural Resources, Office of the Commissioner, is establishing a new fully-exempt position under the exempt service statute AS 39.25.110(9) "persons employed in a professional capacity to make a temporary or special inquiry, study or examination as authorized by the governor."

This position will be a full-time Special Project Assistant, range 26, located in Anchorage. The primary purpose for establishing this exempt position is to employ a professional position to provide high-level assistance to the DNR Deputy Commissioner who is newly tasked with policy oversight of oil and gas fiscal matters for the state. The Deputy Commissioner will retain his existing duties and responsibilities in addition to the new assignment, and will rely on this new position to provide high-level policy support in the areas of oil and gas fiscal analysis, review and development of legislation associated with the fiscal work, and review and analysis of permitting and regulatory efforts and proposals. In addition, this position will be occasionally tasked with taking on some of the day-to-day responsibilities of the Deputy Commissioner when necessary.

Funding for this position will be provided by monitoring vacancy savings within the department and reallocating those savings to the Commissioner's Office.

Reverse Marketing of Statewide Resource Development Initiatives												
	OTI	-50.0	0.0	0.0	-50.0	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		-50.0										

Reverse the one-time appropriation used to support the ramp-up of an aggressive marketing and outreach campaign to support resource development initiatives statewide, and to engage with federal partners to improve access issues for Alaskans plus funding to maintain existing staff levels will support resource development initiatives across the state. Continued funding is requested in the FY2014 base budget.

Restore Marketing of Statewide Resource Development Initiatives

1004 Gen Fund	IncM	50.0	0.0	10.0	40.0	0.0	0.0	0.0	0.0	0	0	0

Continuation funding is requested for a one-time item to support the marketing of statewide resource development initiatives.

The department is using the FY2013 funds for key initiatives to support natural resource development in Alaska. The primary focus of spending so far in the fiscal year has supported the administration's initiatives to 1.) commercialize the North Slope's world-class gas reserves, 2.) reverse the declining flow of oil through Trans-Alaska Pipeline System, and 3.) foster development of a strategic and critical minerals sector.

Examples include:

1.) Support for speaking engagements and extensive meetings in Japan and South Korea with representatives of major utilities, suppliers, and other potential Asian investors. The primary focus of these meetings was to explain the comparative advantages of Alaska LNG exports, with respect to other competing LNG projects around the world. Speaking engagements included: the DNR Commissioner's presentation at the LNG Producer-Consumer Conference in Tokyo, a global conference at which government ministers, LNG producers and consumers discussed LNG issues and projects around the world

the Commissioner's presentation on Alaska gas and mineral opportunities at a reception hosted for Alaska by the U.S. Embassy in Tokyo. This event was attended by more than 70 business and government leaders.

During the Japan-South Korea trip, the state's message reached more than 1,000 company and government officials and resulted in multiple Asian companies arranging follow-up trips to Alaska to further explore opportunities to invest in Alaska.

2.) Advertising and securing of significant editorial space in the world's largest energy magazine (Oil and Gas Journal) to attract investment in Alaska's world-class hydrocarbon potential. The magazine's special report on Alaska will reach more than 300,000 readers worldwide in December. This special report will also be circulated at industry events in the Lower 48 and Asia. The report will educate potential investors on Alaska's future LNG prospects, the state's efforts to reverse the declining flow of oil through TAPS, and the opportunities for companies to invest in the state's enormous, untapped hydrocarbon resources.

3.) support for the 2013 Strategic and Critical Minerals Summit, which brings potential investors, explorers, landowners and others together in a one-day meeting to advance the development of a strategic and critical minerals sector. The 2011 summit was a sold-out event with more than 200 attendees, including potential investors, and resulted in significant, positive national news coverage of Alaska's strategic and critical minerals potential. The summit also provided extensive networking opportunities to facilitate private-sector investment.

In FY2014, funding will likely be used to support the next phases of oil, gas and mineral development in Alaska, and as needed, to support other administration priorities for resource development. These could include marketing to support increased demand for Alaska agricultural and timber products.

Cost Allocation to Comply with Vacancy Factor Guidelines

1004 Gen Fund		-1,290.0										
This removes one-time item funding, used to maintain the current staff level and operational costs to adequately support and facilitate the permitting process for the Alaska natural gas pipeline under AS 43.90. Without the current staff level, monitoring of compliance under the Alaska Gasline Inducement Act license as well as facilitation of the complex permitting process will not be possible.												
Travel funds are used for project coordination, permitting and license monitoring, and to meet monthly with Alaska Pipeline Project representatives in both Calgary, Alberta, Canada, and Houston, Texas. Additionally, close coordination with federal and Canadian agencies requires travel to be successful. Without these funds, we are not able to meet this demand and the progress of the project will suffer.												
Services funds are used for leasing office space and inter-agency billings for IT, telecommunications, and mail/courier support. Without these funds, the office cannot be maintained which would leave the staff unable to perform their duties.												
Reverse One-Time-Item for Gas Pipeline Project Office Contractors and Consultants												
	OTI	-1,150.0	0.0	0.0	-1,150.0	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		-1,150.0										
This removes one-time item funding used to cover costs associated with fulfilling the state's responsibilities as per the terms of the license agreement with TransCanada Alaska. Maintaining the state's current level of technical understanding and project support is essential to success. These funds are used to retain outside experts and consultants for continued gas pipeline analysis including acquisition of baseline data, pipeline engineering (practices and analysis) and design, gas treatment plant design, engineering, and operation, cost overruns, enforcement, remedies, and off-ramps for the licensee and state as well as technical licensee reimbursements audit support. Consultants also provide expertise regarding federal project support including federal loan guarantees and the effects of environmental regulation.												
Restore Gas Pipeline Project Office Staff and Operations												
	IncM	1,290.0	847.5	219.1	213.4	10.0	0.0	0.0	0.0	0	0	0

The purpose of the Gas Pipeline Project Office (GPPO) is to support and facilitate the permitting process for the Alaska Pipeline Project. The GPPO is also tasked with monitoring of compliance under the Alaska Gasline Inducement Act (AGIA) license, takes part in driving and coordinating fiscals negotiations, as well as facilitation of the complex permitting process through construction. As the work progresses through the various phases of the project the GPPO will coordinate action by multiple State agencies to accelerate the permitting process and avoid costly, unnecessary project timeline delays. This office requires funding to cover staff and operation costs associated with fulfilling the State's responsibilities per the terms of the license agreement with TransCanada Alaska, while also maintaining a high level of technical understanding and project support which is essential for success.

	LIT	0.0	-265.0	0.0	265.0	0.0	0.0	0.0	0.0	0	0	0
The Office of Project Management and Permitting (OPMP) realigned authorization to match the anticipated expenditure plan for FY2014. This line item adjustment is made in the Statutory Designated Program Receipt (SDPR) fund source, and will be utilized in the services line to allocate funding (via the RSA process) to other divisions and agencies for work they perform to support permitting coordination efforts. This coordination is requested and paid by individual companies through a Memorandum of Understanding (MOU).												
The authorization is available for transfer from the personal services line in SDPR because some OPMP staff will be charging personal services costs to the CIP fund sources for project coordination work in FY2014, as identified and included in the separate increment (change record). A fund source change was considered, however OPMP projects they will need the additional SDPR to meet anticipated industry requests for coordination and chose to submit this line item transfer to utilize existing authority rather than request an additional increment.

where the work being performed is for general state operations.

The Legislature supported these actions in FY2013 and approved operating budget fund source switches from LDIF to GF for general operations in the Oil and Gas Development component and the Office of Project Management and Permitting component. LDIF appropriations remained in the Division of Mining, Land and Water, and the Division of Agriculture, the two divisions that actually support land sale activities which generate revenue to the fund. In addition, LDIF appropriations remained in the Administrative Services (\$272.5), Information Resource Management (\$207.2), and the Public Information Center (\$75.9) components, all which are considered overhead and do not directly generate revenue to the fund. The intent was to re-evaluate the fund sustainability based on FY2013 projections and take additional actions if necessary. The next step towards ensuring fund sustainability would be to remove LDIF appropriations from the three remaining components not directly contributing to the LDIF revenue stream, which should potentially bring the fund closer to sustainability in FY2014.

Future changes in the use of the fund may be suggested depending on the actual revenue generated over the next year from additional land sales.

Replace Land Disposal Income Fund in the FY2014 Salary and Health Insurance Increases

1004 Gen Fund		0.1										
1153 State Land		-0.1										

The increment for FY2014 Salary and Health Insurance Increases allocates \$.1 to the land disposal income fund (LDIF) based on FY2013 Management Plan funding sources. If the FY2014 LDIF to GF fund change request noted below is approved, this amount will need to be transferred from LDIF to GF.

Department of Natural Resources is requesting to continue a fund change effort that started last legislative session to help ensure the LDIF is sustainable in the long term to support actual land disposal efforts by moving some operating costs from LDIF to General Fund.

The fund has become unsustainable for the long-term due to increased costs and appropriations from the fund, and reduced revenues to the fund.

This Includes changes in components that are considered overhead and do not contribute directly to the generation of revenue for the fund:

- Administrative Services \$272.5
- Information Resource Management \$207.2
- Public Information Center \$75.9.

Replace Land Disposal Income Fund to Help Ensure Long-Term Sustainability of the Fund												
FndChg		0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		75.9										
1153 State Land		-75.9										

Moving a portion of operating costs from land disposal income fund (LDIF) to general fund (GF) continues the Department of Natural Resources' effort initiated last legislative session to assure the LDIF is sustainable in the long term and able to support actual land sale and disposal efforts.

Projections in 2011 showed the fund would become unsustainable for the long-term due to increased costs and appropriations from the fund and reduced revenues to the fund. The department is endeavoring to mitigate this depletion through various means such as delaying capital project expenditures funded from the LDIF, using other fund sources for general operations where appropriate, and requesting budget actions to replace some LDIF with general funds where the work being performed is for general state operations.

The Legislature supported these actions in FY2013 and approved operating budget fund source switches from LDIF to GF for general operations in the Oil and Gas Development component and the Office of Project Management and Permitting component. LDIF appropriations remained in the Division of Mining, Land and Water, and the Division of Agriculture, the two divisions that actually support land sale activities which generate revenue to the fund. In addition, LDIF appropriations remained in the Administrative Services (\$272.5), Information Resource Management (\$207.2), and the Public Information Center (\$75.9) components, all which are considered overhead and do not directly generate revenue to the fund. The intent was to re-evaluate the fund sustainability based on FY2013 projections and take additional actions if necessary. The next step towards ensuring fund sustainability would be to remove LDIF appropriations from the three remaining components not directly contributing to the LDIF revenue stream, which should potentially bring the fund closer to sustainability in FY2014.

Future changes in the use of the fund may be suggested depending on the actual revenue generated over the next year from additional land sales.

The real estate portfolio of the Alaska Mental Health Trust is growing. This position will work on the Trustee approved five-year work plan in order to meet the Trust's revenue goals. This position was approved April 24, 2012.												
Reclass Trust Resource Manager (10-T013) to Full-Time	PosAdj	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	1	0	-1
The Trust Land Office (TLO) is reclassifying Trust Resource Manager (10-T013) a full-time position. This position will be fully funded by Mental Health Trust funds. The position is currently vacant and scheduled to expire September 30, 2013.												
This position will serve as the Northern Region Area Manager. Duties will include the development of professional relationships with representatives of local governments, agencies, and special interest groups. This will occur concurrently with the day-to-day operations of trespass resolution, adjudication, resource development projects, easements, negotiated and competitive land sales, and environmental and reclamation oversight. The position will be responsible for 264,000 surface acres of Mental Health Trust land and travel will be required approximately 50% of the work month. The existing staff has been covering a portion of this workload, but it is not a sustainable solution. The existing area managers have a significant workload managing the Southcentral and Southeast regions. As a result, opportunities to maximize revenue for the Trust in the Northern Region are not being addressed. Additionally, it is critical to actively manage the land to maintain value and reduce trespass.												
In order to effectively manage lands across the state, it is necessary to maintain regional management methods. Reclassing this PCN to a full-time position will allow the Trust Land Office (TLO) to maintain and develop each region more effectively.

The FY2014 Operating Budget will continue funding the annual operation costs for the Trust Land Office (TLO). The TLO was established by statute to manage the lands and other non-cash assets of the Alaska Mental Health Trust Authority. The mission is two-fold: (1) to protect and enhance the value of Alaska Mental Health Trust lands; and (2) to maximize revenues from Trust lands over time. Operating costs include personal services and travel expenses for staff, contractual expenses such as professional services, advertising, postage, and general office supplies. The TLO is advised by the Trust Authority Resource Management Committee.

The FY2014 budget increase for the Trust Land Office (TLO) is in two parts. The first reflects the Legislative Revised Program (RPL) approved by LB&A on June 27, 2012 for the FY2013 budget. The second accommodates the TLO's increased focus on revenue growth; particularly income growth from management of Trust assets.

The TLO has undertaken several initiatives for revenue growth, including establishing regional managers to oversee Trust Land, increases in mining activity on Trust land, moving the southeast Alaska land exchange forward with the U.S. Forest Service, and a significant new real estate investment plan.

Personal Services \$312,500:

The Mental Health Trust Authority Board of Trustees (The Trust) requires the TLO to maintain a near-zero personal services vacancy factor. Anticipated merit increases are included in the budget the TLO presents to The Trust each year. Additionally, the RPL included \$160,300 to fund one position in the Real Estate Section.

Services \$187,300:

The RPL funded term contracts for legal counsel and project management services (Contractual Services: \$200,000). Due diligence is necessary for the TLO to determine if potential projects are in the best interest of The Trust. This requires the use of legal counsel and project management services. These services include project managers, architects, engineers, surveyors, attorneys, and appraisers. The use of term contracts will allow the TLO to have contracts already in place on an as-needed basis.

Travel \$32,200:

The TLO must continue to be active and aggressive in its approach to generating revenue. This requires travel to implement a "sales approach" to natural resource and real estate development and regular visitation to Trust-owned parcels for effective stewardship.

Commodities \$10,800:

The TLO is requesting additional funds in commodities in order to maintain the existing level of services and accommodate for the expansion of staff in recent years.

The assets were purchased in December 2009 by Cook Inlet Energy (CIE). The remaining funds from the original bond will be used as a part of the new bond posted by CIE. This bond will be used toward abandonment and reclamation if CIE abandons the facilities or begins reclamation.

The original bond was held in an escrow account at First National Bank, where interest was earned on the principle. However, it cost over \$1,800/mo in bank fees to hold the money in escrow. The department would prefer to hold the bond in Treasury. Interest earnings on the bond would then require an annual appropriation to the bond. The earned interest would maximize the value of the bond funds available for abandonment and reclamation costs.

Interest earned was \$132.6 in fiscal year 2010. CIE will pay an additional \$132.6 into the bond account.

Unless abandonment or reclamation occurs, all earned interest and bond funds will remain in the bond account.

1004 Gen Fund		300.0										

Arbitration of oil and gas issues is an on-going activity in response to routine but disputed audit findings. In addition, it is predicted that the federal government will require tankers to switch to lower sulfur fuel. This change will open several royalty modification requests from the major producers by July 2013. The current base funding of \$500.0 will not be sufficient for the state to adequately respond to these arbitrations.

1004 Gen Fund		-125.0										

Reverse a one-time increment for the completion of the development of the Guide Concession Area Program. The guiding industry has asked that the department consider implementing a concession program to authorize commercial hunting guides to work within specific areas of the state to reduce the overall hunting pressure throughout the state of Alaska. For over three years, the Division of Mining, Land and Water (DMLW) has been working with existing staff members to initiate the development of this program, with funds provided by the legislature specifically for this project.

This program will offer big game guides the ability to competitively apply for and be awarded authorizations to run a business on state land if selected, but will limit the number of guides running businesses on state land. The program is anticipated to provide a net return to the state, will not affect any other users of state land (private or commercial) and has been discussed and reviewed by the public and agencies.

The Division will complete the following actions:

- Complete the regulation process necessary for the program
- Create all forms, procedures, instructions and templates for all stages of process
- Set up the evaluation panel for the review of prospectus submissions
- Set evaluation criteria for evaluating prospectus submissions
- Mapping work

- Set up the evaluation panel for the review of prospectus submissions
- Set evaluation criteria for evaluating prospectus submissions
- Mapping work

DMLW will use both existing staff and contractual resources to complete the final steps in the development of this program.

Guide Concession Area Program Implementation

	Inc	450.0	315.0	42.5	75.0	17.5	0.0	0.0	0.0	0	0	9
1004 Gen Fund		450.0										

The Department of Natural Resources (DNR) requests funding to begin the implementation phase of the Big Game Guide Concession Program by late FY2014.

The Division of Mining, Land and Water (DMLW) has conducted a multiple year effort since 2006 to modify how guide areas are allocated to increase quality of hunts, provide better stewardship of resources, provide an effective means to allow guides to compete for the opportunities, and meet the thresholds established by past court cases. Since that time DNR has hosted 15 public meetings (in person or via web), collected nearly 450 verbal or written comments and attended many other formal and informal meetings and discussions on the topic. It is expected that the regulations to operate this program will be completed by mid

										PFT	PPT	NP

FY2014.

Program components are now being developed and made "shelf ready" to prepare for the implementation step. DMLW is currently organizing an effort to write, assess, and finalize the essential program components, including: mapping necessary to communicate opportunities and restrictions to prospective applicants; protocols for the panel that will evaluate competitive offerings to include instructions, scoring criteria, and organizational rules; permitting documents with appropriate stipulations that will become the authorization tool; protocols for monitoring and compliance strategies; application package including instructions and guidance for proper completion; and design of a public outreach effort to help the affected public get through the transition/implementation process. It is anticipated that design, development, and completion of the essential program components necessary for implementation can be completed late in FY2014.

Implementation of the Program

To implement the program statewide, DNR would first put out a call for applications for all of the proposed 300 guide areas. Each of the approximately 570 guides will be able to submit an application for up to three areas (in theory, we could receive up to 1,700 applications this first round). The applications are submittals of detailed information and will contain the applicant's responses to a set of criteria, including a detailed business plan for each guiding operation and all supporting documentation that illustrates a guide's history. These submittals may be extensive depending on the applicant's background. In a recent U. S. Fish and Wildlife Service (USFWS) concession offering, one individual submitted 7,000 pages of material when applying for four areas. The DNR application requirements are very similar to that of the USFWS process.

Once the application period is closed, staff will need to screen each application and prepare it for rating by an evaluation panel. Evaluation panels will include at least one DNR staff per panel and currently it is proposed to have 4 panels with three participants each. The application scoring process will be very time intensive. The scoring for the USFWS 2011 concession offering consisted of 8 evaluation panels of 3 people each scoring 235 applications over three weeks. This resulted in 2,880 man hours for their staff. The GCP application process will repeat every three to four years due to an initial staggered approach to permit term length of 4, 7, and 10 years.

The stagger in permit lengths is designed to create a concession process that revolves on an approximate two year cycle. Each cycle includes the preparation for the offerings, the application submittals and scoring, the notice of awards, and the issuance of concession permits. In between and during each offering, staff will be responsible for all of the additional requirements of the program, including: performing annual monitoring and management of the 300 concession casefiles, annual field inspection and compliance checks, annual scoring of year end reports, fee collection, revenue and billing entry, conflict resolution and the mitigation of non-compliance, and education and outreach for the program. In addition to the direct concession program requirements, staff will be tasked with the adjudication and management of all land use authorizations for camps, cabins, and all supporting infrastructure related to commercial guiding.

Current Request

Nine (9) DMLW positions are required to be funded for six months in the budget year FY2014 in order to begin the implementation phase. Without these positions, the program implementation would need to be delayed potentially another year because of the required timing of the roll out of the program related to guide availability.

The following is a breakdown of the required positions:

- 1 - Natural Resource Manager I (10-#038)
- 2 - Natural Resource Specialist III (10-#039 / 10-#040)
- 2 - Natural Resource Specialist II (10-#041 / 10-#042)

Navigable and Public Waters Research and Assertion of State's Access Rights												
	Inc	350.0	64.0	0.0	286.0	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		350.0										

The Division of Mining, Land and Water (DMLW) requests funding for the Navigability/Recordable Disclaimers of Interest (RDI) program which was primarily funded through federal grants that have now dried up with budget reductions at the Bureau of Land Management (BLM). This federal authorization was included in a language section of the budget as Sec19(b) CH41 SLA2010 – and lapsed on June 30, 2012. No additional federal grant funding is available, and there is no-on-going federal receipts in our operating budget to remove or “replace” with general Fund as a fund source change.

The continuation of the Navigability/RDI program is essential to defend state ownership of the submerged land under the navigable waters the state received at statehood.

The Recordable Disclaimers of Interest (RDI) program has successfully cleared clouds on the state's title to numerous navigable waters in Alaska. Currently, the State's RDI program is the only successful RDI program in the United States. It was implemented by DMLW's Public Access Assertion and Defense Unit (PAAD) and the BLM starting around 2006, with the help of a \$1,000.0 federal grant to support navigability research conducted initially by BLM researchers, but later delegated to DNR's Office of History and Archaeology (OHA) Section.

The funding has produced a volume of navigability reports issued upon agreed parameters which are sufficient for justifying applying for RDI's as well as a number of other inter-agency and inter-governmental management and policy decision uses. The focus to date of most of the navigability research has been in the Kuskokwim Basin because of the many systems of rivers and lakes used for transportation.

When the BLM and the State agree on navigability for travel, trade and commerce, the BLM will issue an RDI for that water body. When there is disagreement, a quiet title action must be filed.

The federal funding has been depleted to the point that only state support will keep the program viable. OHA staff attention and funding is now shifted away from preparing navigability reports to support RDI actions to supporting quiet title action litigation initiatives and title defense with RS 2477s and navigable waters with the funding received in FY2013.

Additional funding is needed to keep the RDI program viable as a much less expensive alternative to filing quiet title actions against the federal government. Successful navigable water litigation is expected to result in an increased interest in settling these cases without expensive litigation. Extensive title and historical research must be conducted on each water body to prove sufficient use and proper ownership before a RDI can be issued. Replacement of federal funding for the program will help retain the necessary research on existing and planned actions asserting and defending state title to its navigable waters.

Regulation Packages and Amendments to Support Permit Efficiency and Reform

	Inc	125.0	0.0	0.0	125.0	0.0	0.0	0.0	0.0	0	0	0

appeals on state land and water resource use decisions. Appeals are also increasing exponentially.

This funding will be used to contract for ongoing support in developing regulation packages and amendments, to ensure that both the regulation and appeals workload is adequately covered.

Oversight and Community Liaison for the Offshore Gold Dredging Lease Sales at Nome

Inc	20.0	7.0	3.0	5.0	5.0	0.0	0.0	0.0	0	0	0
1005 GF/Prgm	20.0										

During the summer of 2012 the department provided oversight of offshore dredging activities near Nome. As learned during the first year of providing this type of field monitoring oversight, the department needs to provide services during a longer period of time and to cover the entire mining season. The work needs to be done to maintain an appropriate level of oversight of offshore suction dredge activities next field season in Nome.

A steady influx of miners with varying amounts of experience is anticipated again next year and several state and local agencies rely on the DNR field technician for information and assistance. The work was accomplished last field season with a short-term non-permanent position, but there have been several agency requests for more field presence for a longer period of time. Additionally, increased interest in conducting winter under ice mining is anticipated which will further extend the need for oversight for a longer duration than previously provided.

The FY2013 budget included \$50.5, intended to provide for a short-term non-perm position or contractor, and including the necessary boat rental, fuel, facilities rental and lodging costs. These costs were higher in Nome than originally anticipated, and the non-perm position was for 120 days, which did not adequately cover the entire time period that dredging activity occurred. The additional \$20.0 request will ensure that the department can provide the on-site presence and help manage potential conflicts and issues in the community associated with this state leasing activity. Not receiving this request may increase the potential for noncompliance with mining laws, regulations, and permit stipulations pertaining to offshore mining in the Nome area.

Information Systems Coordinator (10-N12082) and Land Surveyor (10-N13006) for Capital Projects Support

Reclass PCN 10-9422 from Human Resource Technician II in Palmer in the Fire Suppression Preparedness Component to Forester II in Juneau in Forest Management Component.

The Human Resources Technician II position is not necessary at this time due to cancellation of the statewide time and attendance project. The Forester II position is needed for forest resource management and roads projects that are currently in process and planned. This position will have duties including timber sale cruising and layout, road maintenance and development, support of state forests and private sector is needed in Juneau to support the resources program and timber roads projects.

Provides long-term nonpermanent geologic staff required to implement this capital improvement project (CIP) funded initiative. This statewide project began in FY2013 to evaluate Alaska's potential for contributing to the domestic supply of minerals required to meet the nation's needs for military and civilian high-tech equipment and electronics. The primary goal is to acquire and publish essential new geologic, geochemical, and geophysical data throughout the state on rare-earth elements (REE) and other strategic and critical minerals (SCM). Skilled, professional geologists are necessary to successfully acquire the required data and information, and to produce that data in usable form to support the future resource development. If this request is not funded, insufficient geologic staff will be available to conduct the large CIP-funded project the governor and legislature are asking DGGS to do. This funding will allow for two positions, and to help cover other staff working on the project.

Align Authorization for New Horticulture Program												
	LIT	0.0	184.0	10.0	-227.0	33.0	0.0	0.0	0.0	0	0	0
The recent closure of the U.S.D.A. Agricultural Research Service (ARS) Station in Alaska has virtually eliminated all support for the horticulture industry. A horticulture evaluation and development program at the Plant Materials Center will replace lost support and provide service to the primary users (e.g. - landscapers, peony and berry crop industries; rhubarb producers, etc.). \$260.0 was requested and authorized for contract services to implement the new program. The department has determined the need for two positions to run this program in-house. Funding is being transferred from services to personal services to cover the increased cost.

***** Changes From FY2013 Management Plan To FY2014 Governor *****

Parks Maintenance and Operations Increased Costs including Outhouse Pumping, Garbage Service, Snow Removal and Utilities												
Inc		165.5	0.0	42.0	123.5	0.0	0.0	0.0	0.0	0	0	0
1005 GF/Prgm		165.5										

Since 2009, outhouse pumping, garbage service and utilities costs have increased approximately 45% statewide. Volunteer stipend costs have increased as more volunteers are utilized statewide. Volunteer recruitment has become more challenging due to: 1. Increased gasoline costs (many volunteer hosts drive RVs or tow campers) and 2. Competition with other agencies which pay higher volunteer stipends. The new concession contract (begins January 1, 2013) to operate Big Delta State Historical Park will include a reduction of approximately \$12.0 return to the state because the site has experienced a dramatic decline in visitation and revenues. In addition, the state will begin paying the park's utilities in FY2013; that cost is approximately \$5.0/year. Additional facilities, such as the Glen Alps caretaker cabin and the Fairbanks maintenance shop have been built with capital funds but no additional operating funds were allocated to cover the increase in recurring costs, such as utilities, snow removal and routine maintenance.

Increased expenditures are allocated as listed:
 Volunteer payments - \$42.0
 Electricity - \$25.0
 Water and Sewer - \$30.0
 Disposal - \$23.5
 Natural Gas/Propane - \$20.0

The Office of History and Archaeology (OHA) realigned authorization to meet anticipated payroll expenses due to increased personal services costs. The authorization is available for transfer from the services line due to reduced costs associated with professional service contracts relating to preparing the statewide historic preservation plan, project reviews, archaeological excavations, data processing and evaluation, computerization of the statewide inventory, and preparation of National Register nominations.

Transfer Human Resource Tech II (10-9075) to Forest Management												
Trout		0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	-1	0	0
1. Reclass PCN 10-9075 from Human Resource Technician II in Fairbanks in the Fire Suppression Preparedness Component 2. Reclass PCN 10-9075 to Forester III in Fairbanks funded in the Forest Management Component												
The Human Resources Technician II position is not necessary at this time due to demise of the statewide ASSETS project; the Forester III position is needed to lead and coordinate the biomass projects which include Tok, Ft. Greely, Delta, Copper River, military, private electric utilities and Alaska Energy Authority funded projects. Ft. Greely project is well underway and Tok is in the public process toward a long term timber sale. Current projects are straining and will soon exceed the capacity of our resource foresters.
