Project Description/Justification:

The dock is the only marine facility in Cold Bay, Alaska and it is extremely important to have a fully functional and safe facility that can handle the scheduled Alaska Marine Highway ferry services, the coastal transportation barges and the fishing and recreational vessels that travel to Cold Bay. The community is often faced with weather-related challenges, such as extreme high winds. This project allows the community to protect the dock from the elements, increasing its useful life. The Cold Bay Dock Repair project will improve the overall structure and longevity of the dock.
