Project Description/Justification:

The operating agreement between the airlines and the Alaska International Airports System allows for increases in project costs beyond the agreed-upon project budgets and allows for the airports to seek approval from the airlines for cost increases beyond what is permitted by the agreement and for new projects not yet approved. These contingency funds will fund those project cost increases and new projects on an as-needed basis. Without this funding, projects and scope increases to projects receiving airline approval under the operating agreement would be significantly delayed, pending legislative approval.

This request covers the projected needs for one year of the AIAS operating agreement with air carriers.
