No prior funding history

Project Description/Justification:

Freight is a major economic engine for the Anchorage region. With 90% of all freight that enters the State of Alaska moving through the Port of Anchorage, freight distribution centers need safe and easy access to retail, commercial, and industrial sites. Development of the freight mobility study will meet the requirements of MAP-21 and facilitate the implementation of the policies and strategies outlined in the updated 2035 Metropolitan Transportation Plan. Strategies for implementing freight projects that can reasonably be funded and will offer improved freight connectivity and access throughout the region.
