No prior funding history

Project Description/Justification:

This project phase is a result of the design phase that is currently in progress to inspect and analyze the existing float structure and associated mooring, utility and other components. Establishment of recommendations for repair, restoration or complete replacement for consideration of future terminal use is being determined. If replacement is the preferred alternative, consideration of in-kind or other more feasible structure alternatives will be considered. The design phase also includes new improvements to restore or replace the float structure to current structural and safety standards suitable for vehicular vessel traffic to be included in the scope of work.
