# **Prior Funding History / Additional Information:**

## **Project Description/Justification:**

Statewide, the department is responsible for 24 harbor facilities. Most of these facilities are thirty to forty years old and have received little maintenance. The department has prepared a harbor deferred maintenance list to prioritize repairs. This budget request would be used to fund repairs at the top two prioritized harbor facilities at Edna Bay and Papke's Landing (Petersburg). Starting in 2009, the department has completed at least one major harbor deferred maintenance project annually thereby reducing the department's overall backlog of harbor projects from \$27 million (FY2009) to \$15.9 million (FY2014).

| Project Name |  | Legislative<br>District | Total Project<br>Cost |
|--------------|--|-------------------------|-----------------------|
| 1.           | Edna Bay Float and Seaplane Float Repair and Replacement | 33Q                     | \$1,070,400           |
| 2.           | Papke's Landing Float Repair and Replacement             | 32P                     | \$600,400             |
|              |  | Total                   | \$1,670,800           |

Edna Bay Float and Seaplane Float was built in 1984 and 1985. The float is essential to the economic livelihood of the community of Edna Bay, provides for the delivery of goods and services, furthers the interests of local commercial fishermen and charter operators, and serves as the principle means of

transportation to and from the community. Additionally, the seaplane float is the emergency egress means for the community. The harbor facility has broken main stringers, excessive gaps between floats, and could become a public safety hazard if not repaired. Funding would be used for the design and construction of a replacement project.

Papke's Landing was first built in 1961 and last repaired in 1988. The float is essential to the residents living across the Wrangell Narrows and critical for the economic livelihood of lodge owners and charter operators. In addition, the float is very popular with Petersburg residents by providing enhanced sport fish and recreational opportunities. The harbor facility has broken main stringers, is missing several pieces of floatation, and could become a public safety hazard if not repaired. Funding would be used for the design and construction of a replacement project.
