

Statewide - Unstable Slope Management**FY2014 Request: \$1,500,000****Reference No: 54314****AP/AL:** Allocation**Project Type:** Construction**Category:** Transportation**Location:** Statewide**House District:** Statewide (HD 1-40)**Impact House District:** Statewide (HD 1-40)**Contact:** Pat Kemp**Estimated Project Dates:** 07/01/2013 - 06/30/2020**Contact Phone:** (907)465-3900**Appropriation:** Surface Transportation Program**Brief Summary and Statement of Need:**

Research and implementation/deployment for unstable rock and soil slope inventory and assessment program and adding elements of asset management to the Unstable Slope Management Program (USMP) to support decision-making about slopes in transportation corridors statewide. Create Geographic Information System (GIS) based deliverables and a web-based, public-access portal to the USMP.

Project Description/Justification:

The USMP has been under development since 2009. The initial research and development work was conducted by staff and through a research project conducted by the University of Alaska. We have created, with the assistance of consultants, a database of unstable slopes and have tested the program and process on the "Top 200" unstable slopes identified. Most of the Top 200 slopes were inventoried in 2010 and 2011. Our consultant Landslide Technology created a web page portal to the data, which is presently located in the consultant's server, providing access to the inventory data and information collected to date: <http://www.akdot-usmp.com/>. In order to complete the project we need to conduct additional development work on the database architecture, complete the inventory and condition survey process and incorporate asset management elements into the program.
