Project Description/Justification:

The existing asphalt in much of the areas that will be addressed will be over 15 years old by the time work begins and the main taxiway is 30 years old. The Pavement Condition Index (PCI) report shows that most of the pavement to be addressed by this project has a PCI indicating it is in need of corrective action or below the threshold at which rehabilitation is recommended. The project may include additional related work that is determined to be necessary during the design phase.
