Brief Summary and Statement of Need:

In 2008, the University of Alaska Fairbanks (UAF) identified the need to create a more sustainable campus. Since then, the Office of Sustainability was created as a partnership between the Chancellor's Office and the UAF student body with the shared goal of creating a sustainable housing village to accommodate students. This village's sustainability at UAF will be furthered through a partnership with the Cold Climate Housing Research Center's (CCHRC) Sustainable Northern Communities program. In each phase, four houses will be construct to accommodate 16 students. The houses are designed to test sustainable, durable, healthy, and cost effective building technologies for people living in the Circumpolar North.
