Project Description/Justification:

Bryant Airfield – The Department of Military and Veterans Affairs is responsible for 24 facilities totaling 147,774 square feet and the campus' airfield runway, taxiways, parking, storage yards, and roadways. This project provides design bid ready documents (DBRD) to expand/lengthen the runway to accommodate all aircraft in the Army inventory. It also installs an oil/water separator in Hangar 2 to meet federal Clean Water Act requirements.

Camp Denali – The DMVA is responsible for 30 facilities totaling 452,230 square feet and the campus' communication towers, parking lots, roadways, military vehicle and equipment storage yards. This project expands military and private vehicle parking and installs roadway lighting.

Alaska Military Youth Academy (AMYA) – The DMVA is responsible for 23 facilities totaling over 68,214 square feet and the campus' lighting, parking and roadways. This project provides a mass notification system to deliver announcements and safety information to youth and staff. It also constructs a bus barn that will protect AMYA's busses from the weather to extend their useful life.

Priorities and cost estimates may need to be changed to accommodate emergency maintenance projects not listed, actual project costs, and other considerations.
