Project Description/Justification:

The Wildwood Correction Center (WWCC) was constructed in 1981 and contains 18,000 square feet of space. This project provides roof repair to the warehouse building eight (\$300,000) and security control upgrades to building ten (\$745,000) at the WWCC.

This project is a compilation of essential capital maintenance requirements at this institution. The list is fluid between the time the Governor's budget is submitted and the time the appropriation is authorized. During this time period, other critical projects may be identified while several projects already on the list have reached completion. Funds are then allocated to the most urgent of the remaining projects. The projects not completed become the basis of the next fiscal year capital appropriation request. Adjustments to the deferred maintenance project allocations may be necessary between all 24-hour institutional facilities to meet emergency needs as they arise.
