Miscellaneous small projects are identified and need to be implemented in a timely manner to address safety issues, functionality, security concerns, building efficiency, aesthetics, etc. Some of the projects covered in this general category involve safety or ADA requirements. It would be in the airport's best interest to address all issues that present a safety risk to the public and reduce the chance of injury/or lawsuits. Other possible projects (i.e. Telecom/Equipment Rooms) economic benefit would be determined based on tenant needs for expansion/or upgrading to newer technology. With the current status of telecommunications/equipment rooms, the ability to accommodate an additional air carrier/or other types of operations is fairly restricted.
