Project Description/Justification:

The Department of Transportation and Public Facilities is responsible for maintaining more than 15,000 lane miles of public roads statewide. Approximately 4,000 of those lane miles are gravel. There are more than 13,000 culverts that need to be maintained and approximately 45,000 highway signs. Under requirements established by the Federal Highway Administration, the department is also responsible for inspecting 953 bridges on publicly owned roads. These include 788 bridges owned by the Department with the balance owned by other state agencies, cities, and boroughs.

In order to maintain a higher service level and therefore higher customer satisfaction, vegetation management efforts along roadsides are critical deferred maintenance activities that improve sight distances and remove food sources and camouflage for large animals such as moose (safety) and preserve road surface integrity by improving drainage and reducing edge cracking.
