Prior Funding History / Additional Information:

Project Description/Justification:
The Runway Visibility Zone at Cold Bay Airport is deficient and currently prevents expansion of the Part 139 required Airport Firefighting and Rescue (ARFF) Building and prevents local businesses near the main runway from improving their properties. The ARFF building cannot be expanded unless this project is executed within three years of receipt of the Federal Aviation Administration (FAA) grant for the ARFF building. This project is a high priority safety improvement for the operation of this regional classification airport that is certificated with nearly 10,000 annual enplanements and is an important reliever airport for Anchorage International Airport.
