

Ted Stevens Anchorage International Airport - Information **FY2016 Request: \$1,018,464**
Technology Improvements **Reference No: 45680**

AP/AL: Allocation **Project Type:** Information Technology / Systems / Communication

Category: Transportation **House District:** Anchorage Areawide (HD 12-28)
Location: Anchorage Areawide **Contact:** Jeff Ottesen

Impact House District: Anchorage Areawide (HD 12-28) **Contact Phone:** (907)465-4070
Estimated Project Dates: 07/01/2015 - 06/30/2020
Appropriation: Airport Improvement Program

Brief Summary and Statement of Need:

This project is for the installation of new/updated technologies, and replace aging or no longer supported hardware on a planned basis to decrease the likelihood that airport operations are hindered by delays in data, information transmission and access. Improvements include replace/upgrade operational workstations, servers, switch, and miscellaneous information technology (IT) infrastructure necessary for airport operability and/or the life cycle is expired.

Project Description/Justification:

The airport is providing a state of the art data processing and network connectivity system to all resident airlines, the traveling public, and State of Alaska employees. Keeping Anchorage International Airport (ANC) information technology (IT) infrastructure as current as possible is the best way to enable support of these new and current applications and users.

All operations at the airport are affected by the current state of information technology. The challenge

for IT at Ted Stevens Anchorage International Airport is to provide a common infrastructure that is secure, with high availability and efficiency. Application integration will build on that infrastructure to provide high data availability and efficiencies. Implementation of intelligent, standards-based systems will allow facilities, equipment and personnel to be used in more flexible and productive ways.
