Project Description/Justification:

Miscellaneous small projects are identified and need to be implemented in a timely manner to address safety issues, functionality, security regulations, Americans with Disabilities Act requirements, building efficiency, etc. It is in the Airport's best interest to address all issues that present a safety risk to the public and reduce the chance of injury/or lawsuits.

Anchorage International Airport (ANC) facilities are required to provide a safe, reliable and comfortable work environment for the public and airport employees. This includes minimizing excess cost and maximizing use of available resources. Updating and standardizing equipment promotes efficiency, simplifies preventive maintenance schedules, reduces recurring training, reduces

State of Alaska Capital Project Summary Enacted FY15 & FY16

Department of Transportation/Public Facilities Reference No: 47809 Released June 30, 2015 Ted Stevens Anchorage International Airport - Facility Improvements, Renovations and Upgrades

FY2016 Request: Reference No:

\$1,166,990 47809

warehouse inventory, and reduces overall maintenance cost and energy consumption. Some projects may have a direct and short-term payback such as replacing lighting with more energy efficient fixtures and enhancing heating ventilation & air conditioning controls systems.

Examples of the types of projects that may be undertaken are as follows:

- Replace automatic and overhead doors
- Replace lighting fixtures with more energy efficient fixtures
- Replace/repair leaking window glazing
- Repair/rebuild escalators and elevators
- Build-out space for Transportation Security Administration as needs change
- Replace/rebuild aged mechanical equipment
- Upgrade/expand telecommunications, security, access control and closed circuit television systems
- Repair roofing to extend useful life

Other possible projects (i.e. telecom/equipment rooms) economic benefit would be determined based on tenant needs for expansion/or upgrading to newer technology. With the current status of telecommunications/equipment rooms, the ability to accommodate an additional air carrier/or other types of operations is fairly restricted.
