

**Fairbanks International Airport - Information Technology Improvements**      **FY2016 Request: \$32,000**  
**Reference No: 47819**

**AP/AL:** Allocation      **Project Type:** Information Technology / Systems / Communication

**Category:** Transportation      **House District:** Fairbanks Areawide (HD 1-5)

**Location:** Fairbanks Areawide      **Contact:** Jeff Ottesen

**Impact House District:** Fairbanks Areawide (HD 1-5)

**Estimated Project Dates:** 07/01/2015 - 06/30/2020      **Contact Phone:** (907)465-4070

**Appropriation:** Airport Improvement Program

**Brief Summary and Statement of Need:**

Install new/updated technologies, and replace aging or no longer supported hardware on a planned basis to decrease the likelihood that airport operations are hindered by delays in data, information transmission and access. Improvements include replace/upgrade operational workstations, servers, switch, and miscellaneous information technology (IT) infrastructure necessary for airport operability and/or the life cycle is expired.

**Project Description/Justification:**

The airport is providing a state of the art data processing and network connectivity system to all resident airlines, the traveling public, and State of Alaska employees. Keeping Fairbanks International Airport's information technology (IT) infrastructure as current as possible is the best way to enable support of these new and current applications and users.

All operations at the airport are affected by the current state of information technology. The challenge for IT at Fairbanks International Airport is to provide a common infrastructure that is secure, with high availability and efficiency. Application integration will build on that infrastructure to provide high data availability and efficiencies. Implementation of intelligent, standards-based systems will allow facilities, equipment and personnel to be used in more flexible and productive ways.
