Estimated Project Dates: 07/01/2016 - 06/30/2021

Contact Phone: (907)465-4070

Appropriation: Surface Transportation Program

Brief Summary and Statement of Need:

Design and construct projects that are part of the Alaska IWAYS Architecture Implementation. Program areas include snow and ice removal, multi-modal information connections, traveler communications, internal operations, commercial vehicle operations and traveler safety and infrastructure security. Funding is also used for maintenance and operations of systems in use.

Project Description/Justification:

The Alaska Department of Transportation and Public Facilities, through cooperation with local, regional, and state agencies, initiated a statewide ITS (Information Technology System) implementation plan, more commonly known as the Alaska IWAYS Architecture Implementation (AI2). AI2 sets forth a coordinated approach to improve transportation system efficiency and inter-agency communication through the effective deployment of ITS technologies in Alaska. AI2 was developed using nationally accepted guidelines (National ITS Architecture) and an approach that takes into consideration ITS activities that have occurred throughout the United States.

To meet the transportation user needs, AI2 focuses on six program areas where intelligent transportation project deployment can provide the greatest benefits: commercial vehicle operations, multi-modal information connection, internal operations, traveler safety and infrastructure security,

traveler communications, and snow and ice control. AI2 addresses the needs within each of the six program areas and maps them to the broader National ITS Architecture to clearly show how each of those needs can be met.
