Reapprop for Deferred Maintenance, Renewal, Repair and Equipment - NTE $550,000

FY2018 Request: $0
Reference No: 61804

AP/AL: Appropriation
Category: Education
Location: Seward
Impact House District: Kenai Areawide (HD 29-31)
Estimated Project Dates: 06/30/2017 - 06/30/2021
Contact: Paloma Harbour
Contact Phone: (907)465-5984

Brief Summary and Statement of Need:
This project provides deferred maintenance funding for the Alaska Vocational Technical Center’s (AVTEC) 16 buildings located in Seward. Specific projects include First Lake Facility fire safety egress improvements; cafeteria safety and health renovations; and campus-wide asphalt, sidewalk, curb, and retaining wall repairs. Overall, AVTEC’s entire deferred maintenance needs total $12.9 million across eight separate projects. $550,000 addresses the highest priority needs relating to life, health, and safety. Prior deferred maintenance appropriations have been fully-expended. Most recently, AVTEC utilized a combination of available project balances to complete an asbestos abatement project at the First Lake Facility.

**First Lake Facility Fire Safety Egress - $250,000**
A building egress deficiency was identified during a certificate of occupancy inspection for use of the First Lake Facility upon completion of an asbestos abatement project. This deficiency must be addressed quickly to ensure the safety of AVTEC students and staff and comply with Seward building safety code. The First Lake Facility is AVTEC’s headquarters facility. The facility houses AVTEC’s business office and administration, the Maritime Department, the Business Office Technology Department, a counseling office, a conference room used by staff and students, and a job resource center utilized by members of the public to seek employment-related information.

**Cafeteria Safety and Health Renovations - $250,000**
To ensure a safe and healthy eating environment for AVTEC students, the cafeteria floor drains require replacement, deteriorating roof shingles need replaced, and ceiling tiles and windows require replacement. The original floor drains are past their service life and need replacement to avoid catastrophic failure. Interior ceiling tiles, vents, and ventilation equipment need replaced or cleaned if salvageable. The ceiling is 30 years old and any movement creates a cascade of debris that impacts the food preparation area below. Aged windows need replaced with new energy efficient windows.

**Campus-wide Asphalt, Sidewalk, Curb and Retaining Wall Repairs - $50,000**
The corridor between the Student Services Center (SSC) and 4th Avenue Dorms is unstable due to heavy snow accumulation and poor drainage. Repairs are needed to provide safe student access between buildings. This repair includes removal of an underground fuel tank and construction of a new retaining wall. Large amounts of sidewalk and curbing are broken and damaged, and must be removed and re-poured. Many sections of access roadways are deteriorated and need resurfacing, removed and re-poured curbs and sidewalks. The entire scope of work for this project is estimated to cost $200,000. Partial funding of $50,000 for FY2018 allows AVTEC to begin addressing repairs. Future funding considerations will be made to address the remaining funding need.

Priorities and cost estimates may need to be changed to accommodate emergency maintenance projects not listed, actual project costs, and other considerations.
