**Project Description/Justification:**

The purchase of the subsurface interests would simplify and consolidate title of these properties in public ownership, and would contribute to the protection of their habitat values. The subsurface purchase would be from a willing private seller at fair market value based on an independent appraisal that must satisfy government appraisal standards.

The funds would be drawn from the EVOS Investment Trust Fund to accomplish this purchase, including for necessary due diligence and transactional expenses to complete the purchase. Legislative approval is needed to complete the purchase utilizing EVOS funds.

This project would achieve beneficial consolidation of interests in lands with recognized high habitat value on Afognak/Kodiak Islands in public ownership by authorizing purchase of subsurface interests underlying surface interests the State holds as a result of other EVOS and other federal conservation fund purchases. With the State holding title to both surface and subsurface interests the restoration purposes of the EVOS Trust would be furthered.
