The Department of Natural Resources has an Intergovernmental Personnel Act (IPA) agreement with the Bureau of Land Management (BLM) for the assignment of the Executive Director of the North Slope Science Initiative (NSSI). This assignment is fully funded by BLM under the IPA agreement.												
This agreement began in January of 2017 and is expected to continue. This agreement has been a great resource to DNR and ensures that the State has a seat at the table to guide efforts by the NSSI that benefit the public. The development of an NSSI program that focuses on science-based approaches to responsibly develop North Slope resources while limiting negative impacts, proactively responding to the needs of the region and protecting cultural values, are important to the state.

The loss of this position in our GIS unit would eliminate the only entry-level GIS position within the department, and may impact the department's ability to recruit new staff who have limited experience, but have GIS skills or aptitude.												
Deletion of this position will require the remaining team members to pick up the workflow transactions that were performed by this position. The GIS unit is already feeling the effects of the FY2017 deletion of three GIS positions due to budget cuts in FY2017, as Division of Mining, Land and Water GIS users look to this unit for assistance.												
The balance of funding for this position, approximately 22.0, will remain in the component to fund shortfalls in Reimbursable Services Agreements (RSA).

1004 Gen Fund		-125.0										
The department will realize lease savings from the Atwood consolidation by reducing office space by over 23,000 square feet.												
Since FY2012 the department's core service costs (including leases, IRIS, Microsoft, audit, mainframe, Linny Pacillo parking garage) have increased \$1,227.0 (24%), while general funds in the Facilities and Chargeback components have decreased by \$372.0 (4%). As a result, divisions have absorbed these increases, and their costs have increased \$547.0 (21%) since FY2012.

Change Recorder II Positions from Full-Time to Part-Time												
	PosAdj	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	-2	2	0
The Recorder's Office is in the process of a reorganization of staffing. Two Recorder II positions (10-0323 and 10-0324) were deleted in FY2018 Governor's budget. It was determined that a more effective action would be to delete two other positions (10-0369 and 10-0360) which are deleted in FY2018 Management Plan. In addition, the two remaining positions (10-0323 and 10-0324) will change from full-time to part-time. These changes achieve the goal of the decrement in FY2018 Governor's budget while still meeting the need of the public.												
Change (10-0323) Recorder II, range 11, Juneau, from Full-Time to Part-Time												
Change (10-0324) Recorder II, range 11, Palmer, from Full-Time to Part-Time

The FY2019 Operating Budget will continue funding the annual operating costs for the Trust Land Office (TLO). The TLO was established by statute to manage the lands and other non-cash assets of the Alaska Mental Health Trust Authority. The mission is two-fold: (1) to protect and enhance the value of Alaska Mental Health Trust lands; and (2) to maximize revenues from Trust lands over time. Operating costs include personal services and travel expenses for staff, contractual expenses such as professional services, advertising, postage, and general office supplies. The TLO is advised by the Trust Authority Resource Management Committee.												
Change Long-Term Non-Perm Trust Resource Manager (10-T025) from Non-Perm to Full-Time												
	PosAdj	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	1	0	-1
The conversion of this Long-Term Non-Perm Trust Resource Manager to Full-Time will allow the continued development and support of all Trust Land Office (TLO) GIS systems, databases and title work that is crucial in every aspect of land management and resource development. This type of work cannot be performed by other TLO staffers and is critical to day-to-day operations as well as long-term planning. It will not be possible for the TLO to continue with our current level of revenue generating activities if this position is not made permanent.

In 2009, Pacific Energy Resources Limited (PERL) abandoned Redoubt Unit as a result of bankruptcy. The bond in the amount of \$6,600.0 along with interest earned for abandonment liabilities for the Redoubt Unit between PERL and Department of Natural Resources' (DNR) Division of Oil and Gas was transferred to DNR in October 2009.

The assets were purchased in December 2009 by Cook Inlet Energy (CIE). The remaining funds from the original bond will be used as part of the new bond posted by CIE. This bond will be used toward abandonment and reclamation if CIE abandons the facilities or begins reclamation.

The original bond was held in an escrow account at First National Bank, where interest was earned on the principle. It costs over \$1,800/month in bank fees to hold the money in escrow. The department would prefer to hold the bond in Treasury. Interest earnings on the bond would then require an annual appropriation to the bond.

DNR requests that the interest earned be applied to the bond. The earned interest would maximize the value of the bond funds available for abandonment and reclamation costs.

1004 Gen Fund		250.0										

Reservoir studies capital funds were allocated in FY2009 to build and maintain sophisticated reservoir models in house. Rather than build and maintain these models it was found to be more cost effective to pay yearly for the proprietary software necessary to analyze data to the degree that would allow qualitative policy decisions with respect to field development and hire consultants to analyze reservoirs on the North Slope and Cook Inlet on an as-needed basis.

The majority of the capital project was reappropriated to the high priority Arctic Strategic Transportation and Resources (ASTAR) project at the end of FY2017 leaving enough funds to cover FY2018 software licensing and contractual services for imminent reservoir analysis, with the understanding that an operating budget increment would be requested for FY2019.

This one time item will allow the Division of Oil & Gas (DOG) to hire consultants to analyze reservoirs on the North Slope and in Cook Inlet. Reservoir dynamic models are used to predict future performance and recovery of oil, water and gas. The results from predictive model runs are used to calculate where production originates in the reservoir and under which leases. In this manner, equity in a producing reservoir is established by calculating volumes recovered from each owner's lease and the resulting royalty volumes are determined.

The nature of resource evaluation requires technical experts to perform state-of-the-art mechanistic and deterministic three-dimensional (3D) studies. A static model is created from thousands to hundreds of thousands of pieces of data. A dynamic reservoir model is created and populated with data that describes the rock and fluid (oil, water and gas) characteristics over the range of pressure and temperature conditions. In addition, the layers of the reservoir are described as thousands of cells with length, width and height dimensions. All of the mathematical fluid and flow relationships are put in the 3D computer models to calculate and match reservoir history. Enhanced oil recovery processes are also included to predict and estimate the impact on recovery. Both the static and dynamic models may be modified to attain a better history match and improve model performance.

Differential lease royalty terms and different mineral estate owners' equity stakes must be accurately determined. The state may wish to perform their own model studies to audit the unit operators' work or to evaluate a disagreement on where hydrocarbons are produced and how much is allocated to each equity owner and mineral estate owner.

Oil and gas producers typically conduct these studies for stakeholders, but there are occasions when the stakeholders do not agree or align on technical and commercial issues. It is in the state's interest to perform due diligence studies to assure the state's interest is protected and to verify and validate the producers' work. A recent study disputed a producer's work, resulting in an additional \$100 million in state revenue (net present value).

Reverse amount in settlement of a claim against a bond guaranteeing the reclamation of state, federal, or private land, including the plugging or repair of a well, estimated to be \$25.0 for the Division of Mining, Land & Water.

Language

The amount received in settlement of a claim against a bond guaranteeing the reclamation of state, federal, or private land, including the plugging or repair of a well, estimated to be \$50,000, is appropriated to the Department of Natural Resources for the purpose of reclaiming the state, federal, or private land affected by a use covered by the bond for the fiscal year ending June 30, 2018.

Note: The Division of Forestry utilizes the same language section, also with an estimated amount of \$25.0, for a total of \$50.0 referenced in the language.

Replace General Fund with Program Receipt Authority Using New Revenue

	FndChg	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		-1,000.0										
1005 GF/Prgm		1,000.0										

The Division of Mining, Land and Water is a revenue producing division, generating approximately \$14.3M in general fund program receipts and a total of \$29.7M in total revenue in FY2017. With the statewide budget challenges, the division is seeking to transition more of its work to be supported more directly by those using the division's services.

In order to be responsive to those seeking to commercially use state land which benefits the economy in the state, the division will shift more of its expenses to the revenue earned to better show the correlation between costs and revenue generated. With the existing level of work demand and anticipated new revenues the division can safely increase its dependence on revenues earned by \$1,000.0 in FY2019.

Native Allotment Program Fund Source Change

	Dec	-100.0	-100.0	0.0	0.0	0.0	0.0	0.0	0.0	-1	0	1
1004 Gen Fund		-100.0										

The federal Native Allotment program, located in the Realty Services Section of Division of Mining, Land & Water, is currently comprised of three positions, and has been solely funded by unrestricted general funds. One position has been vacant since October 2016 because of funding uncertainty.

The division recently received a \$100.0 grant from the Federal government which will be used to fund a long-term non-permanent (LTNP) position to process native allotment reconveyance requests. The division requested that the federal grant be modified to allow for funding of this full time position, but that request was denied. With the loss of this position additional Native Allotment reconveyance case file work may be constrained until further or expanded federal funding is received. The division has adequate federal authority to accept this grant.

Unified Permit Program Reduction

	Dec	-245.0	0.0	0.0	-245.0	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		-245.0										

The reduction in contractual services for the Unified Permit Program is consistent with the increment received in FY2018. This is a planned scaling down of the project with no impact.

The Unified Permit (UP) Project is an automated business information management system for Department of Natural Resources (DNR) permitting. The target audiences are DNR managers and staff who authorize the use of state land and resources, and the public who apply for the use of these resources. The project automates easements, land use permits, material sales, leases, and water rights. Once we have this capacity we can expand to other permit types, depending on resource availability.

The overall project goals are:

Shorten and make consistent cycle times and processes for authorizations;

Improve the permit application process for our customers by delivering interactive applications for authorizations that guide customers to the correct questions and help them to supply content;

Build internal systems that support and improve DNR productivity allowing staff to increase time spent on critical land stewardship work; and

Scan active case files in order to provide structured access to all content within the DNR case management environment.

In FY2018 the budget is \$1,385.0 and seven positions.

In FY2019 the budget will be reduced by (\$245.0) to \$1,140.0 by eliminating certain services. Seven positions will be funded.

In FY2020 the budget will be reduced by (\$321.0) to \$819.0. Four positions will be funded.

Restore temporary authority for the Hunting Guide Concession Program.												
Currently there is no process by which the commercial use of state land is allocated among commercial big game hunting guides and there are no limits on the number of Division of Mining, Land and Water (DMLW) authorizations a guide can have on state land. This method of management has led to overcrowding and overutilization in some game management unit areas and underutilization in others. In 2013, DMLW developed a draft management framework for a Guide Concession Program (GCP) which will competitively select big game guide outfitters to conduct commercial guiding on state land. The purpose of the GCP is to encourage land stewardship, support wildlife conservation, and to promote a healthy guiding industry to benefit the people of Alaska.

Reverse Haines State Forest, Timber & Mining Access

OTI	-102.0	-102.0	0.0	0.0	0.0	0.0	0.0	0.0	0	-1	0
1004 Gen Fund	-102.0										

The part-time Forester II in Haines supports timber sales, firefighting, and all other activities in and near the Haines State Forest (HSF). The HSF is the longest established state forest in Southeast Alaska, and Southeast Alaska Timber sales make up 75% of statewide timber sales. It is important to note that while supporting timber related activities, the same activities support other valuable industries such as providing road access to the developing Constantine-Palmer mine. Funding the position ensures that recent timber sales have sufficient on-site oversight, maintains the area's firefighting posture, and ensures there is a position to deal with forest road issues as the Constantine-Palmer mine moves from exploration toward production.

Reverse Settlement of Claims Against Reclamation Bonds Sec33c Ch1 SSSLA2017 P104 L30 (HB57)

(Language) OTI	-25.0	0.0	0.0	-25.0	0.0	0.0	0.0	0.0	0	0	0
1108 Stat Desig	-25.0										

Reverse amount in settlement of a claim against a bond guaranteeing the reclamation of state, federal, or private land, including the plugging or repair of a well, estimated to be \$25.0 for the Division of Forestry.

Language

The amount received in settlement of a claim against a bond guaranteeing the reclamation of state, federal, or private land, including the plugging or repair of a well, estimated to be \$50,000, is appropriated to the Department of Natural Resources for the purpose of reclaiming the state, federal, or private land affected by a use covered by the bond for the fiscal year ending June 30, 2018.

Note: The Division of Mining, Land & Water utilizes the same language section, also with an estimated amount of \$25.0, for a total of \$50.0 referenced in the language.

Restore Forester in Haines

IncM	102.0	82.0	3.5	15.0	1.5	0.0	0.0	0.0	0	1	0
1004 Gen Fund	102.0										

A one-time increment was appropriated by the legislature in the FY2018 budget. This increment would return this funding to the base budget.

Funding would support a seasonal Forester II in the Haines State Forest office, which is facing closure due to previous funding reductions. This position has duties associated with the timber sale program, personal use firewood permits, road maintenance, and provides oversight for a variety of commercial and public uses in the state forest.

Change Record Detail - Multiple Scenarios with Descriptions (294)

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions		
										PFT	PPT	NP

The state forest contributes to the Haines economy by providing access for numerous multiple use activities that are a mix of commercial and personal use. An active timber sale program encourages and supports jobs in the forest products sector, produces revenue and provides access to the state forest by maintaining and keeping the road system open. The roads provide access for the personal use firewood program, which is utilized by residents and businesses as a primary or supplemental heating source. Other key points for consideration:

- Businesses that depend on state timber sales in the Haines State Forest will be able to obtain a consistent wood supply. Timber sales will be offered on a regular basis consistent with the allowable cut level. Last year there were six separate businesses that purchased timber sales in Haines.
- The twenty million board foot timber sale (Baby Brown) will be re-offered for sale this winter and will need contract administration and oversight. This position also completes timber sale work on behalf of the Mental Health and University Trust Land Management Programs, which generates revenue for their respective trust programs and is an efficient use of staff to meet forest management needs for different agencies.
- Forty-six miles of state forest roads will be reviewed and maintained in compliance with 11 AAC 95.320 of the state forest practices regulations. Timber sale revenue and timber sale purchasers have provided road maintenance as part of their ongoing operations and these methods would continue as the primary way for road maintenance to be accomplished.
- The road system provides critical access for the Palmer Mine project which is accessed via the Porcupine Road in the state forest.
- Access for the proposed Walker Lake Hydroelectric Project utilizes roads in the state forest.
- Recreational activities of all types, both motorized and non-motorized, will occur on state forest lands. The community depends on these roads for personal use, berry picking, hunting, fishing, and other subsistence activities.
- The state's forests are a renewable resource and Alaska's future will depend on the development of natural resources. Forestry has been a major driver in access development in many regions of the state and our road systems have facilitated other natural resource development projects.

If funding is not approved, the division will continue the orderly shutdown of the office once the issue of the 46-mile road system in the Haines State Forest is addressed. Many roads will need to be closed or put into long-term storage until they are needed for a timber sale to be compliant with the State's Forest Resources and Practices Act (FRPA). The Act and our state forest Management Plan require active maintenance of the road system to protect water quality and fish habitat and without on-site personnel, this will be difficult to achieve. Only primary roads will be kept open unless the responsibilities can be transferred to another state agency or the Haines Borough.

Timber sales and management of the Haines State Forest will continue, but from offices in Ketchikan and Juneau. Slower response times for both public and commercial users should be expected.

Restore Settlement of Claims Against Reclamation Bonds

This increment will be used to supplement existing general funds in support of the State Veterinarian program. The Alaska livestock sector continues to grow and the Division of Agriculture has an increasing demand for these services. The State Veterinarian will lead the livestock outreach and education while maintaining animal health standards.

Food security is of utmost importance to our state due to the distance and vulnerable food distribution system into the state. Alaska imports 95% of the \$2 billion of food that Alaskans purchase. As Alaska diversifies its economy there is tremendous opportunity for agriculture to thrive, creating jobs and putting dollars back into the community. Every year it is estimated that \$1.9 billion leaves the state from the food Alaskans purchase.

In recent years, the awareness and demand for local foods has increased dramatically. Livestock and poultry are an important component of this demand. As

these numbers increase so has the demand for locally produced animal feed, in turn creating a need for an increased local grain production. The potential for growth in this sector and the impact it can have on other agriculture sectors is tremendous. In 2016, Mt. McKinley Meat and Sausage successfully transitioned into the private sector and we believe the stability this provides the livestock industry will further facilitate growth. The Southcentral region has also seen the construction of additional slaughter and processing facilities, further stabilizing market growth.												
To grow the livestock industry in Alaska it's important to disseminate accurate and timely information to producers and appropriate enforcement and regulatory authorities. As animals are imported, animal health knowledge and education will be key to a successful industry. Industry will need information on diseases that can be imported, disease detection, and development of a quarantine protocols. All animals imported into the state will have oversight from the State Veterinarian, who will issue importation certificates. On the export side, a voluntary livestock registration program will be created to promote and meet international requirements to get animal products into foreign markets.												
To start a business and grow, livestock farmers need guidance and support to understand the Alaska-specific nutrition, health, and care requirements of their animals. There will also be a need to understand the impact of herbicides and pesticides on feed, which will affect manure that could end up in the organic growing industry.												
On a national level, there is a need to have a voice for Alaska when it comes to federal regulations, given our unique environment that is not always represented. As changes are made, outreach and education to the industry will be vital.												
Two positions will support this effort: 10-3127 State Veterinarian, range 24, Palmer, Full-Time (reclassified from a vacant Natural Resource Manager II, range 20) 10-3084 Development Specialist I (Option B), range 18, Palmer, Full-Time (reclassified from a vacant Agronomist II, range 18)												
There is a surplus in the Agricultural Revolving Loan Fund component due to the sale of the Mt. McKinley Meat & Sausage Plant. Contractual services for utilities and outside contractors are no longer required.

Transfer to Department of Administration for Shared Services of Alaska Implementation												
	Atrout	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	-1	0	0
The Department of Natural Resources is transferring an initial wave of positions to the Shared Services of Alaska organization for travel and accounts payable activities.												
The Shared Services organizational structure provides back-office support for common administrative functions, allowing the agency to focus more closely on core mission responsibilities.												
The Shared Services organization model will increase the quality and speed of service delivery, and increase client satisfaction while decreasing the overall cost to the department for performing these functions. This is achieved through a business structure focused on continuous process improvement that includes standardizing business processes and improving transaction cycle-times. It is anticipated that an initial ten percent savings can be realized in FY2018 for these activities, with increased savings in future fiscal years.												
Budget authority is retained by the department to fund a reimbursable services agreement with Shared Services of Alaska for the cost of services provided.												
The following PCN will be transferred to the Shared Services organization:												
Full-time Administrative Assistant II (10-5115), range 14, located in Anchorage

Transfer Historian I (10-5123) from Office of History and Archaeology												
Trin		0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	1	0	0
This position has been vacant since 10/31/2015 due to lack of funding in the Office of History and Archaeology.												
The Parks Management and Access component has a need and funding for this position under the Design and Construction Section for ongoing projects, and the position will be re-classed to an Engineering Assistant I/II/III Flex (Range 17/19/21, Anchorage, Full-Time).												
Transfer In (10-5123) Historian I, Range 16, Anchorage, Full-Time												
Replace General Fund with Program Receipt Authority Using New Revenue												
FndChg		0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		-500.0										
1005 GF/Prgm		500.0										
This fund source change from general funds to general fund program receipts will utilize new revenue from increased park fees.												
The current fee regulations (11 AAC 5) provide an upper limit on various park use and permit fees, which are then set by Director's Order. Division of Parks and Outdoor Recreation has reached the upper limit in several areas of the fee structure, and has proposed a regulation change to increase the limits. The timing of the passage of the new regulation is expected to occur in mid FY2018, and the revenue from these increased fees in FY2019 is estimated to be \$600.0.												
Capital Improvement Project Receipt Authority for Parks Management and Access												
Inc		400.0	0.0	0.0	400.0	0.0	0.0	0.0	0.0	0	0	0
1061 CIP Rcpts		400.0										
The Parks Management and Access component has historically had insufficient capital improvement project receipt authority to reflect all reimbursable services agreements (RSA). Increasing capital improvement project receipt authority will allow the division to avoid unbudgeted RSAs in FY2019.												
Reduce Uncollectable Inter-Agency Receipt Authority												
Dec		-250.0	0.0	0.0	-250.0	0.0	0.0	0.0	0.0	0	0	0

Change Natural Resource Tech II (10-5094) from Part-Time to Full-Time Program Coordinator II for Revenue Generation												
PosAdj		0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	1	-1	0
This position, reclassified from a Natural Resource Technician to a Program Coordinator, will provide a singular point of contact and oversee all Division of Parks & Outdoor Recreation's promotional and marketing activities, special events, social media management, website revisions and oversight, with a focus on programs that bring direct revenue to the division (e.g., Arts in the Parks).												
A coordinated communication strategy and consistent and effective promotional activities that increase visitation, commercial operating permits, and public use cabin occupancy, will streamline current efforts which have been enthusiastic, but not as effective as a comprehensive and interconnected strategy would be.												
One of the Division's goals in the coming years is to increase revenues through a variety of mechanisms and this position will be a critical tool to realize these revenue increases.												
The work previously performed by the Natural Resource Technician has already been absorbed by other Kodiak area staff.

Transfer Historian I (10-5123) to Parks Management and Access												
	Trout	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	-1	0	0
This position has been vacant since 10/31/2015 due to lack of funding in the Office of History and Archaeology.												
The Parks Management and Access component has a need and funding for this position under the Design and Construction Section for on-going projects and the position will be re-classed to an Engineering Assistant I/II/III Flex (Range 17/19/21, Anchorage, Full-Time).												
Transfer Out (10-5123) Historian I, Range 16, Anchorage, Full-Time												
Capital Improvement Project Receipt Authority for History and Archaeology												
	Inc	272.0	272.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1061 CIP Rcpts		272.0										
The History and Archaeology component has historically had insufficient capital improvement project receipt authority to reflect all reimbursable services agreements (RSA). Increasing capital improvement project receipt authority will allow the division to avoid unbudgeted RSAs in FY2019.												
Reduce Uncollectable Inter-Agency Receipt Authority
