

State of Alaska FY2020 Governor's Operating Budget

Department of Fish and Game EVOS Trustee Council Component Budget Summary

Component: EVOS Trustee Council

Contribution to Department's Mission

The mission of the *Exxon Valdez* Oil Spill Trustee Council (the Council) is to work toward restoring and enhancing the environment injured by the *Exxon Valdez* oil spill (EVOS) to a healthy and productive ecosystem through the use of the EVOS settlement.

Core Services

- The Council was formed to jointly use the 1991 civil settlement to restore, replace, enhance, or acquire the equivalent of natural resources injured as a result of the oil spill and reduced or lost services provided by such resources. The Council consists of three State of Alaska trustees and three Federal trustees.
- The program is funded through the invested earnings of the Exxon Valdez Oil Spill Investment Joint Trust Fund. These funds are considered joint-trust funds and guidelines for the use of these funds has been designated by the U.S. District Court in 1991, as well as being subject to any other applicable court orders, state and federal law.
- The Council provides an annual program that focuses restoration activities on supporting the resources affected by EVOS, scientific research regarding natural recovery and monitoring; habitat enhancement and protection; public participation; project evaluation; and efficient administration.

Major Component Accomplishments in 2018

Building upon its extensive outreach and review work from FY2011-12, in FY2017 the Council continued to implement two coordinated, integrated programs focused on Long-Term Monitoring and Herring Research and Monitoring. In addition, the Council funded a multi-agency suite of projects focusing on aquatic ecosystem restoration.

Council staff developed electronic files and increased the documents available on the Council's website. Council staff responded to numerous media and public information requests regarding EVOS and the Council, as interest increased after Deepwater Horizon and other recent spills.

The Council also provided founder support to the Alaska Resources Library and Information Services (ARLIS), home of the *Exxon Valdez* Oil Spill Trustee Council's comprehensive collection of materials and public records. As of July 31, 2017, for FY17 ARLIS has received 47,355 visitors. ARLIS Technical Services has cataloged 4,379 books and reports, scanned 2,828 reports and documents for digital archiving, and is in the process of scanning 148 boxes of EVOSTC files pertaining to the Trustee Council Official Record, and the Natural Resource Damage Assessment (NRDA) files as part of two ongoing projects. Further statistics are currently being compiled, and this report will be updated at the completion of federal FY2017.

Key Component Challenges

The mission of the Council's restoration program is to work toward the recovery of resources affected by EVOS. Restoration actions are focused on supporting healthy, productive ecosystems that maintain naturally-occurring biodiversity. The Council provides guidance and direction to the program for successful long-term research, monitoring and protection of habitats. This includes producing information that can serve restoration through resource management actions and scientific research. The program emphasizes credible science through the active participation and review of technical and scientific experts, and the meaningful participation of the public.

Through the hundreds of studies conducted since the spill, the Council has come to recognize that ecosystem restoration is not easily addressed, due to a changing environment and the difficulty in being able to distinguish the effects of oil from other factors impacting injured resources and services. In addition, the joint trust funds continue to diminish. Thus, the challenge for the Council is to use the remaining trust funds efficiently to serve restoration goals,

including producing information that can serve restoration through resource management actions and scientific research.

Significant Changes in Results to be Delivered in FY2020

In FY2019, the Council will continue to monitor and guide the funding of the long-term monitoring and research focus areas developed through the NEPA process in FY2011 and implemented with five-year invitations in FY2012 and FY2016. This implementation includes working closely with the funded entities in many areas, including scientific oversight, funding flow, and data management. The Council also continues to work within its established habitat program to support recovery of resources affected by EVOS.

The Council office also works with the identified programmatic focus areas and efficient project completion. Council staff continues to update and organize, index, and digitize the numerous physical and electronic documents that have accumulated over twenty-five years of Council restoration work.
