Project Description/Justification:

Public recreational trails contribute to Alaska’s economy by providing construction and maintenance jobs, attracting tourists and visitors, stimulating the business of outfitters, guides and tour companies, and improving the mental and physical well-being of the workforce. This program ensures:

- Grantees obtain legal access
- Projects are consistent with federal, state, and local land use plans and laws

- Social and economic impacts are analyzed
- Archeological and historical resources are protected
- The project is analyzed for any impact on threatened or endangered species
- The project is analyzed for any impact on fish and wildlife
- The project is analyzed for its effect on wetlands, flood plains, and bodies of water
- Water and air quality are checked and maintained
- Hazardous waste is checked for and identified
- The noise resulting from the project is analyzed
- There is public involvement
- The project grants \$1.5 million in federal dollars to the government and community organizations for trail development and improvement projects statewide. The National Recreational Trails Program (RTP) requires the split of the funding to be 30% non-motorized, 30% motorized, and 40% diversified trail projects. As more and more residents and visitors turn to Alaska’s vast trail system for recreation, subsistence and basic transportation between communities, the need for a more extensive and better-maintained trail system continues to grow. Many existing trails are being lost as property is sold, subdivided, or developed without reserving trail easements.
- This program identifies, maintains and expands the Alaska trail system for both summer and winter trails. Legal, safe, well-maintained, and easy to use trails are reducing trespass situations, search and rescue occurrences, and public safety concerns. Because these are matching grant programs, grantees provide cash, labor, and equipment to match 10% of grant funds, stretching existing funding.
