The Citizens' Advisory Commission on Federal Areas is an organization that works alongside the Department of Natural Resources. A special assistant in the Office of the Governor will be assigned the duties of this position to continue advancing and protecting the State's interests.												
The State's fiscal reality dictates a reduction in expenditures across all agencies.

Carry forward the unexpended balance of the appropriation made in Sec19(b) Ch1 TSSLA2017 P22 L21 (SB23) for the Arctic Strategic Transportation and Resources (ASTAR) project. ASTAR is a collaborative effort initiated by the Department of Natural Resources to form a cooperative group of stakeholders in the region to guide the development of future infrastructure projects to best benefit the communities of the North Slope, identify material sites critical to resource development and to provide access to areas that may require remediation from previous exploration activities.												
Sec. 19. DEPARTMENT OF NATURAL RESOURCES. (b) The unexpended and unobligated general fund balances, estimated to be a total of \$7,303,482, of the following appropriations are reappropriated to the Department of Natural Resources for the Arctic strategic transportation and resources (ASTAR) project for the fiscal years ending June 30, 2017, June 30, 2018, June 30, 2019, and June 30, 2020:												
(1) sec. 13, ch. 29, SLA 2008, page 159, lines 28 - 29, as amended by sec. 35(c), ch. 18, SLA 2014 (Department of Transportation and Public Facilities, Trunk Road, phase 1), estimated balance of \$2,905,729;												
(2) sec. 7, ch. 43, SLA 2010, page 31, lines 26 - 28 (Department of Natural Resources, reservoir studies for North Slope and Cook Inlet - \$3,500,000), not to exceed \$2,797,753 of the estimated balance of \$3,297,753; and												
(3) sec. 32(c), ch. 17, SLA 2012 (Alaska Railroad Corporation, Tanana River bridge access for military training grounds and river training), estimated balance of \$1,600,000.												
Original Appropriation: \$7,303.5 FY2017 Expenditures: \$0.0 FY2018 Expenditures: \$382.1 FY2019 Expenditures: \$1,941.4 FY2020 Carryforward: \$4,980.0

Add Large Project Coordinator (10-#163) for Natural Resource Development Project Work												
	PosAdj	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	1	0	0
Add a full-time Large Project Coordinator (10-#163), range 23, located in Anchorage, for natural resource development project work. The Office of Project Management and Permitting (OPMP) is experiencing an increase in requests to provide project coordination to major infrastructure and industry projects. The ability to accept these requests and funding agreements from industry is contingent on OPMP having project coordinators available. An additional Large Project Coordinator is necessary to assist the Alaska public with timely permit decisions for natural resource development projects.

1004 Gen Fund		595.0										
Add authority to provide federal plans review and coordination. Federal plans review and coordination has statewide implications for resource development, including mineral and oil and gas leasing, exploration, production, and establishment of utility and/or transportation corridors on federally managed lands.

										PFT	PPT	NP
Federal plans also influence access to adjacent State and privately-owned lands. The Bureau of Land Management's resource management plans directly affect the State's land entitlements. The Office of Project Management and Permitting (OPMP) budget does not currently include funding for federal plans review and coordination. This lack of funding presents a critical threat to OPMP's ability to serve this core function.												
In FY2021 and beyond, federal agencies are expected to begin implementation and/or transition into the next phase of program development. OPMP anticipates revisions to the Arctic National Wildlife Refuge Comprehensive Conservation Plan, led by the U.S. Fish and Wildlife Service, to ensure consistency with oil and gas leasing in the Coastal Plain area. Funding federal plans review and coordination ensures the State has the resources necessary to engage with federal partners in the future, which remains essential to Alaska's economic growth and prosperity, regardless of national positions and priorities.

The Recorder's Office will build on consolidation efforts started in FY2016 and FY2018, closing the Juneau and Palmer Recording offices. Offices will close for over-the-counter customers and research, and customers can continue to record electronically, by mail, and in person in Anchorage, Fairbanks, and Kenai. Electronic Recording (e-Recording) was first implemented in 2012 and available statewide in 2013. Each year the percentage of use goes up, reducing the need to maintain expensive offices across the state. Currently 55% of documents are e-Recorded, and 70% of revenue is brought in via e-Recording.												
The State's fiscal reality dictates a reduction in expenditures across all agencies.

Transfer authority from Information Resource Management to Public Information Center for office support.

The transition of several Information and Resource Management (IRM) positions to Department of Administration, Office of Information and Technology, reduced the need for interagency receipt authority for Information Resource Management due to fewer reimbursable services agreements. The Public Information Center gained a new Natural Resource Specialist, which increased the need for interagency receipt authority in order to process a budgeted reimbursable services agreement with internal divisions to fund the position.

This transfer eliminates the need for the fiscal staff to request, set up, and track an unbudgeted reimbursable services agreement in the state's accounting

The FY2021 Operating Budget will continue funding the annual operating costs for the Trust Land Office (TLO). The TLO was established by statute to manage the lands and other non-cash assets of the Alaska Mental Health Trust Authority. The mission is two-fold: (1) to protect and enhance the value of Alaska Mental Health Trust lands; and (2) to maximize revenues from Trust lands over time. Operating costs include personal services and travel expenses for staff, contractual expenses such as professional services, advertising, postage, and general office supplies. The TLO is advised by the Trust Authority Resource Management Committee.

										PFT	PPT	NP

earned for abandonment liabilities for the Redoubt Unit between PERL and Department of Natural Resources' (DNR) Division of Oil and Gas was transferred to DNR in October 2009.

The assets were purchased in December 2009 by Cook Inlet Energy (CIE). The remaining funds from the original bond will be used as part of the new bond posted by CIE. This bond will be used toward abandonment and reclamation if CIE abandons the facilities or begins reclamation.

The original bond was held in an escrow account at First National Bank, where interest was earned on the principle. It costs over \$1,800/month in bank fees to hold the money in escrow. The department would prefer to hold the bond in Treasury. Interest earnings on the bond would then require an annual appropriation to the bond. DNR requests that the interest earned be applied to the bond. The earned interest would maximize the value of the bond funds available for abandonment and reclamation costs. Unless abandonment or reclamation occurs, all earned interest and bond funds will remain in the bond account.

If funding is not received, interest earned on the bond held by Department of Revenue's Division of Treasury cannot be applied toward future bond requirements, imposing additional financial burden on this small and producing company.

Transfer Natural Resource Specialists from Oil and Gas for Aquatic Farm Application Processing

Trin	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	2	0	0
------	-----	-----	-----	-----	-----	-----	-----	-----	-----	---	---	---

Transfer Natural Resource Specialists from Oil and Gas to Mining, Land and Water for aquatic farm application processing. The physical consolidation of the State Pipeline Section staff within the Division of Oil and Gas onto the 8th floor of the Atwood building creates significant program process efficiencies and maximize our resources in the Division of Oil and Gas. With this consolidation, the division is transferring two positions to the Division of Mining, Land Water and repurposing them for aquatic farm application processing.

The following positions are transferred:

Full-time Natural Resource Specialist III (10-0121), range 18, located in Anchorage

Change Record Detail - Multiple Scenarios with Descriptions (294)

	Inc	98.8	92.8	5.0	0.0	1.0	0.0	0.0	0.0	1	0	0
1153 State Land		98.8										
Add authority to complete necessary Final Finding and Decision (FFD) documents for land sales and add a full-time Natural Resource Specialist II (10-#197), range 16, located in Fairbanks. One cornerstone of the Governor's administration is to increase the amount of Alaska Lands into Alaskans' Hands. Part of the process in fulfilling this goal is completing a FFD. FFDs require a significant amount of research, agency review, public comment, and outreach. It is often the case that lands that are best suited for inclusion in the land sale program require reclassification. Without lands being appropriately classified for disposal, and the Land Sales team following the constitutional and statutory requirements for public notice when disposing of a state asset, land sales are not possible.												
Due to the complexity of the steps involved in preparing the necessary documents, each adjudicator can only produce, on average, two to three FFDs per year. An increase in staff provides the program an opportunity to meet the Governor's vision of increasing the amount of land offered for disposal to Alaskans and increases revenue generated by increasing the number of FFDs completed and the number of parcels sold. Without this additional authority, the Land Sales program will not be able to meet one of the Governor's key objectives.												
Aquatic Farm Application Processing												
	Inc	187.3	181.3	5.0	0.0	1.0	0.0	0.0	0.0	0	0	0
1005 GF/Prgm		187.3										
Add authority to collect and expend receipts related to additional demand for new aquatic farm lease applications. The Aquatic Farming industry is experiencing explosive growth throughout the State of Alaska. Due to this growth, the number of applications for site authorizations has increased significantly. Prior to 2017, the average number of new aquatic farm lease applications was two. Starting in 2017, the number of new aquatic farm applications increased to 16. The trend has continued, and in 2018 and 2019, 30 new aquatic farm applications were received by the division. All aquatic farm applications are processed as leases and are disposals of a state interest. This process includes a preliminary decision, public comment period, review and response to comments, incorporation of relevant changes to decision, issuance of an FFD and the requisite appeal period. The division currently has one staff member assigned to process all the Aquatic Farm applications.												
The growth of the Aquatic Farm industry is important to the stabilization of the economies throughout temperate, coastal Alaska. Without additional staff the delay of issuing leases may slow the growth of the industry and effect local economies. The additional increases will be offset by the reduced time necessary to get farms under lease and the state realizing lease income.

Add Authority for Forest Land Use Plans for Individual Timber Sales

Inc	12.0	0.0	0.0	12.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1155 Timber Rcp	12.0											

Add authority for oversight and administration of the timber sales contracts, in addition to preparing new timber sales for purchase (particularly in Southeast). The division completes forest management plans at the forest level, publishes the five-year schedule of timber sales and writes Best Interest Findings and Forest Land Use Plans for individual timber sales.

Add Authority for Forest Inventory Analysis Program

Inc	69.9	69.9	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	8	0
1002 Fed Rcpts	69.9											

Add authority for the Forest Inventory Analysis (FIA) Program. The FIA program is a federally funded project that is part of a national framework that tracks the overall condition of the nation's forests on all lands. Forests are viewed as a strategic and economic asset. Its health, location, types, and quantities of wood - in addition to the ecosystem services it provides are of great importance to the state and nation.

During the ramp-up period of the program between 2016 to 2018, hired staff were trained to ensure the logistical support was in place to support a 24-person field crew each season. The 2019 season was the first operational year for the state team. A total of 4,858 forested plots will be installed and re-measured on a ten-year interval.

Most of the staff are hired as non-permanent each year, and this change converts key leadership positions that are not currently in the budget system to permanent seasonal positions. This change increases efficiencies by significantly reducing the time spent on recruitment, onboarding, and the training process. It also results in a more efficient field operation as preliminary estimates show that staff led by a returning crew leader require 30 fewer hours of overtime over a season. Also, employees can fully utilize the benefits from day one of their work seasons, accrue leave, and have a sense of stability. Lastly, this provides a stronger pipeline to upper-level positions throughout Forestry and the FIA program. This increase covers the cost difference between non-permanent and

Add Authority to Change Natural Resource Technician II (10-?144) to Meet Increased Workload												
	Inc	25.0	25.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1005 GF/Prgm		25.0										
Add authority to support the change a Natural Resource Technician II (10-?144), range 12, located in Anchorage, from part-time to seasonal full-time to address increased visitation to the Geologic Materials Center (GMC) and an increase in sample requests.												
During FY2019, the Division of Geological and Geophysical Surveys (DGGS) added a seasonal part-time Natural Resource Technician II using tax credit seismic data funds to support the additional workload caused by dispensing seismic datasets to the public. During calendar year (CY) 2019, DGGS witnessed a 20% increase in visitation to the GMC and a 125% upswing in sample requests as compared to CY2018. Both service support areas have undergone three to four-fold growth as compared to activities sustained by three full-time staff at the former Eagle River GMC facility. Increased use of the facility requires additional staff to meet client needs.												

Change Record Detail - Multiple Scenarios with Descriptions (294)

Department of Natural Resources

Component: Geological & Geophysical Surveys (1031)

RDU: Fire Suppression, Land & Water Resources (602)

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	PFT	PPT	NP
Daily client support services now consume the majority of GMC staffs' time. Shifting more day-to-day tasks to a full-time Natural Resource Technician II position will allow senior staff to better apply their considerable and unique knowledge to the future benefit of the GMC. In addition to existing seismic data support, new responsibilities for the full-time Natural Resource Technician II are to comprise timely, courteous, and accurate customer service to geologic clients; client service, revenue, and metrics tracking; warehouse inventory support; and maintaining organization of client and warehouse workspace.												
The amount requested is based on the cost difference between a non-permanent position and a permanent full-time position. If this request doesn't get approved, customer service, collection curation, and the state's ability to assist with oil and gas and mineral exploration in Alaska will be affected.												
Replace Non-permanent Positions with Permanent Positions for Ongoing Critical Projects												
	PosAdj	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	-5
Delete non-permanent positions to be replaced with permanent seasonal positions to support ongoing critical projects. Permanent positions are more appropriate because there is a consistent workload for ongoing projects. This change will also save resources by reducing the necessity of recruiting and hiring non-permanent staff on a project-by-project basis, also permanent positions have the benefit of better staff recruitment and retention and cross-training between various projects.												
The following positions are deleted: Non-permanent Geologist III (10-N11004), range 19, located in Fairbanks Non-permanent Geologist I (10-N11030), range 15, located in Fairbanks Non-permanent Geologist II (10-N20001), range 17, located in Fairbanks Non-permanent Natural Resource Specialist III (10-N19007), range 18, located in Fairbanks Non-permanent Natural Resource Technician III (10-N19044), range 14, located in Fairbanks												
Replace Non-permanent Positions with Permanent Positions for Ongoing Critical Projects												
	PosAdj	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	6	0
Add seasonal full-time positions to replace non-permanent positions to support ongoing critical projects. Permanent positions are more appropriate because there is a consistent workload for ongoing projects. This change will also save resources by reducing the necessity of recruiting and hiring non-permanent staff on a project-by-project basis, also permanent positions have the benefit of better staff recruitment and retention and cross-training between various projects.												
The following positions are added: Seasonal full-time Geologist I (10-#188), range 15, located in Fairbanks Seasonal full-time Geologist II (10-#189), range 17, located in Fairbanks Seasonal full-time Natural Resource Specialist III (10-#190), range 18, located in Fairbanks Seasonal full-time Natural Resource Technician III (10-#191), range 18, located in Fairbanks Seasonal full-time Administrative Assistant III (10-#192), range 15, located in Fairbanks Seasonal full-time Geologist II (10-#193), range 17, located in Anchorage												
Add Natural Resource Technicians (10-#208 and 10-#209) for Multispectral Scanning Project												
	PosAdj	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	2	0	0
Add two Natural Resource Technicians for a multispectral scanning project. The work on the project leverages the value of the Geological Materials Center energy and mineral core and rock collections using petrophysical, hyperspectral, and optical analytical digital scanning technologies to expand global access to Alaska geologic datasets and stimulate the exploration and development of Alaska's resources.												

The following positions are added:

1153 State Land		233.2										

Transfer North Latitude Plant Materials Center to Agricultural Development for project collaboration. The Division of Agriculture works closely on related projects with budget components within Fire Suppression, Land & Water such as Mining, Land & Water (DMLW) and Forest Management & Development.

The Division of Agriculture and DMLW will operate the Agricultural Lands Sales program as a joint project. The Division of Agriculture develops agricultural sales projects. When the project is ready for an actual sale, the DMLW Land Sales Section will do the land sales process. Upon completion of the sale, the Division of Agriculture staff will manage the on-the-ground supervision and paperwork. The DMLW contracts section will then manage the contracts. Upon receipt of patent, the Division of Agriculture team manages the ongoing agricultural issues such as farm plans. The process of completing the project goes back and forth between the divisions. Transferring the division will provide more operational latitude to the divisional managers as each land sales project moves through the process.

Forest Management has several federal grant programs with the United States Department of Agriculture that overlap with the work of the Division of Agriculture. Moving the Division of Agriculture with these budget components will provide more efficiencies in the budgeting and management process of mutual projects. This movement will reduce staffing and programmatic redundancy between the two components.

The following positions are transferred in:

Full-time Agronomist I (10-1727), range 16, located in Palmer
 Full-time Agronomist I (10-3025), range 16, located in Palmer
 Seasonal full-time Maintenance Generalist Journey (10-3026), range 54, located in Palmer

currently unbudgeted due to the lack of interagency receipt authority. This increment allows the division to accommodate anticipated agreements for FY2021, and results in greater efficiencies between the division and the fiscal staff's workload as it will eliminate the need to coordinate and set up individual unbudgeted reimbursable services agreements. If this request is not approved, there will be a continuous need to annually set up unbudgeted reimbursable services agreements, which can cause a delay in getting reimbursed by the buyer agency.

Add Authority to Support Transparent Budgeting of Reimbursable Services Agreements												
	Inc	80.0	0.0	0.0	80.0	0.0	0.0	0.0	0.0	0	0	0
1007 I/A Rcpts		80.0										
Add authority to improve transparency in budgeting reimbursable services agreements. The division has numerous reimbursable services agreements that are currently unbudgeted due to the lack of interagency receipt authority. This increment allows the division to accommodate anticipated agreements for FY2021, and results in greater efficiencies between the division and the fiscal staff's workload as it will eliminate the need to coordinate and set up individual unbudgeted reimbursable services agreements. If this request is not approved, there will be a continuous need to annually set up unbudgeted reimbursable services agreements, which can cause a delay in getting reimbursed by the buyer agency.
