Project Description/Justification:

Division of Retirement and Benefits (DRB) will be replacing two retirement system AS400 servers which are close to End of Support (from IBM) with an off-premises cloud solution. This solution is anticipated for a period of three to four years until a new enterprise-wide retirement system is purchased and installed. Funding will be used to purchase and replace IBM hardware that is one to three years from the end of life based on industry standards. Additionally, funding will support the migration to the cloud solution. If Division of Retirement and Benefits continues running this aged equipment it will unnecessarily increase risks of a systemic failure and potential disruption of services to the members of the pensions and health plans. Pension benefits processing and/or payroll, as well as health eligibility and health claims payments may be delayed or disrupted.
