1004 Gen Fund		331.0										
<p>A supplemental request for \$331.0 is required to fund the additional resources necessary to address an extreme unexpected weather event.</p> <p>On April 2, 2021, Northern Region experienced an unprecedented winter event that the National Weather Service reports set a new record for the most snow fall in a single event during the month of April and is the second-highest snow fall event on record for the area. This event resulted in 12-22 inches of snowfall within approximately 48 hours, followed by unseasonably high winds. This caused extreme drifting, avalanches, closed several roadways, and put many of DOT&PF's roadways in a very difficult or hazardous driving condition. The temperatures at the time of the event hovered around 32 degrees, making the snow composition high in moisture content.</p> <p>Following the heavy snowfall and high winds, temperatures dropped significantly within 24 hours to well below zero, freezing much of the remaining snow and ice to the roadways. This caused additional safety concerns for the traveling public and made it incredibly difficult to remove. In order to promptly respond to this event, address roadway safety, and return the infrastructure to pre-storm condition (including protecting infrastructure from damage during spring thaw), the region was required to leverage additional resources (materials, overtime, and contractor services).</p>
