On April 2, 2021 Northern Region experienced an unprecedented winter event that the National Weather Service reports set a new record for the most snow fall in a single event during the month of April and is the second-highest snow fall event on record for the area. This event, along with compounding weather events that followed, resulted in additional safety concerns for the traveling public and has made snow and ice incredibly difficult to remove. In order to promptly respond to this event, address roadway safety, and return the infrastructure to a pre-storm condition, which includes protecting infrastructure from damage during spring thaw, the region was required to leverage additional resources (materials, overtime, and contractor services).</p>	331.0				331.0						UGF
