**Brief Summary and Statement of Need:**

The state's transportation assets are regularly damaged by natural weather occurrences, such as ice jams, floods, earthquakes, slope failures, windstorms and heavy snows. When these unforeseen events occur, repairs to the state's highways, airports, and facilities are needed immediately to restore transportation service to communities and to minimize disruptions to commerce. The costs for repairs related to extreme weather events often exceed the department's ability to cover with annual operating budgets. These funds would provide the department with a vital tool in combating the effects of natural disasters on the state's assets.
