Project Description/Justification:
This program supports cooperation between federal, non-state agencies and the state, where the state has specialized knowledge or can combine work for a federal agency with work being done by the State of Alaska, Department of Transportation and Public Facilities to save costs.

This project has primarily been utilized for Transportation Security Administration related work reimbursed at 100% or the airport fueling service company for abatement work. The reimbursable authority is required to allow the department to bill entities for non-federal and non-state participating work.
