Brief Summary and Statement of Need:

The alcohol licensing database is outdated and does not provide an efficient license management system. The current system does not provide adequate document storage or historical records, distinguish the different license statuses, electronic submission of applications, maintain a record of notes or payments, board actions, or enforcement actions. Additionally, the current system is limited in the search functions and reporting tools.

Project Description/Justification:

A modern licensing system will allow for electronic submission of license and permit applications, and online payments. Replacing the system will increase efficiencies in alcohol licensing workflow and result in faster application processing and more robust licensing data.
