Brief Summary and Statement of Need:

The National Historic Preservation Fund (NHPF) is a federal grant program to assist states with their historic preservation programs and projects executed through cooperative agreements or grants with federal and local agencies. This program contributes to the department’s mission through development, conservation, and use of Alaska’s heritage properties and is consistent with the public interest and the Alaska Historic Preservation Act.

Project Description/Justification:

The National Historic Preservation Fund capital project provides funds for Alaska's ongoing State Historic Preservation Program, which includes sub-grants to local governments, for-profit and nonprofit organizations, individuals, and owners of historic properties. There is an ongoing need for the protection, preservation, and rehabilitation or

restoration of historic properties. Other historic preservation projects eligible for grants include surveys and inventory of historic properties, education, planning, and training.

This program permits the Department of Natural Resources to accept funds from the federal government, the private sector, and local governments and to pass these funds to historic preservation grant recipients as part of funding agreements for historic preservation projects. Pass-through historic preservation projects assist meeting statewide historic preservation planning goals. These projects help identify, evaluate, plan, interpret, nominate to the National Register of Historic Places, restore, stabilize, and protect historic properties throughout the state.

Cooperative projects with federal agencies allow the State to pursue cultural resource management projects of mutual interest. If the federal grant funds were not accepted, an opportunity to invest in Alaska's historic properties would be missed and threatened historic properties would be at greater risk. Without this funding, the State's historic preservation program could not sub-grant those funds to the public, government, and business sectors. Historic properties would deteriorate, developers and planners could experience project delays and additional costs because site inventory data is not available, and opportunities for cooperative projects would be missed.

There are three parts to this grant:

1. Ten percent of the entire grant apportionment (\$120,000 - \$150,000 per year) is set aside for Certified Local Government Grants, which are matched 40% by local governments.
2. \$200,000 of the grant apportionment is set aside for Development Grants which require a 50% match. The recipients match the Development Grants that are issued to private non-profits and individuals.
3. The grants issued to DNR divisions are matched by the general fund match (GFM) in this project (\$150,000).

The remainder of the grant apportionment is used to fund a large portion of the Office of History and Archaeology's operating budget and is matched 60/40 by GFM in the operating budget.
