**Brief Summary and Statement of Need:**

This project will conduct spring aerial surveys to document Prince William Sound Pacific herring milt distribution and biomass, collect and process age, sex, and size samples of herring, and provide a research platform (R/V Solstice) for an adult herring disease sample collection and processing. This project is a continuation of Fish and Game herring assessment that has occurred since the 1970's and informs the model that determines if the minimum pre-fishery biomass threshold required in regulation for a commercial herring fishery to occur in Prince William Sound is met.

**Project Description/Justification:**

This project will help meet the overall goals of providing sound scientific data and products to inform resource managers and the public of changes in herring stocks and in the Prince William Sound (PWS) ecosystem. The funding will cover charter costs for aerial surveys (\$45,000 annually), charter costs of the R/V Solstice (\$26,000 annually), staff personnel time (\$96,000 annually), travel to the herring Principle Investigator meeting, and equipment such as sampling nets, glass slide, scale glue etc.

This project was awarded \$1.9 million for Exxon Valdez Oil Spill fiscal (EVOS) year 2022-2031. Results are published annually in the Prince William Sound & Copper River Annual Management Report.
