

# **State of Alaska FY2023 Governor's Operating Budget**

## **Department of Transportation/Public Facilities Anchorage Airport Facilities Component Budget Summary**

**Component: Anchorage Airport Facilities**

**Contribution to Department's Mission**

Protect the state's investment in all airport buildings by maintaining, in the most cost-effective manner, the infrastructure, utilities, structures, and other facilities to meet or exceed their expected life cycle at an acceptable level of service. This component provides a clean and attractive passenger terminal and other airport facilities to the traveling public and airport tenants.

**Core Services**

- Operate and maintain the airport terminal buildings, field maintenance facilities, aircraft rescue and firefighting facility, and 29 other state-owned or managed buildings and structures at Ted Stevens Anchorage International Airport (ANC).
- Operate and maintain heating, ventilation, and air conditioning (HVAC) systems; closed circuit television, overhead paging system, baggage conveyor systems; escalators and elevators; automated doors and gates; interior lighting systems; surface finishing; exterior electrical systems; tie-down and vehicle parking; electrical outlets and flood lights.
- Administer the physical layer of systems used for the delivery of voice, data, and video throughout the airport.
- Coordinate, review and inspect both tenant and state-sponsored construction, renovations, repairs, and small works projects.
- Provide 24-hour daily preventive and corrective maintenance, cleaning, dusting, sanitation, and trash and waste pickup in the passenger terminals.
- Remove snow from sidewalks, walkways, terminal roof and ramp entrances, and assist field and grounds maintenance when needed.

**Major Component Accomplishments in 2021**

- No flight delays or cancellations due to equipment provided and maintained by airport facilities.
- Continued to lead the State in initial response to COVID-19 pandemic:
- Installed touchless water fountains in public areas and UV fans in elevators.
- Installed new communications equipment, operating console, radio consolettes and recording systems for the Airport Dispatch Center.
- Installed isolation valves in the South Terminal water supply system; allows for system isolation for maintenance, reducing impact on tenant operations.
- Installed new "high efficiency" water heaters for the South Terminal. Reduces energy use and provides consistent water temps for tenants and public use.
- Upgraded security access control and CCTV system.
- Built new office spaces for ANC emergency response coordination and gate management personnel.
- Upgraded over height warning system for lower ramp clearance issues.
- Upgraded electronic signage system for lower ramp traffic queue.
- Maintenance and custodial staff completed over 30,000 preventive and corrective maintenance work orders.
- Maintenance significantly reduced and enhanced critical infrastructure components: HVAC systems; lighting upgrades in several facilities; improved camera coverage; and rebuilt several baggage handling system sections and baggage make-up units. Improved building automation.
- Enhanced security systems with upgraded cameras and enhancements to access control and gate access/exits.
- Several in-house projects completed to support other component operations, which reduced contractor costs.

**Key Component Challenges**

- Recruitment and retention of skilled trades (HVAC technicians, electronic technicians, electricians, and plumbers).
- Increasing operating costs: utilities, parts/materials, and shipping.
- Most systems are no longer under warranty and will require service agreement contracts increasing costs.

- Replacing and overhauling aging equipment.
- Americans with Disabilities Act requirements keep changing which increases costs.
- New technology upgrades, software changes, and support.
- Critical support facilities for airport operations need equipment upgrades or replacement:
  - South Terminal cooling capacity, escalator/elevators, bag lines, bag claim carousels, make up units, architectural finishes.
  - North Terminal infrastructure: boilers, chillers, escalators, gate hole areas, restrooms, lighting, bag lines, and make-up units.
  - Field maintenance facilities: HVAC issues.

### **COVID-19 Response and Telework Challenges**

- Availability of equipment, chemicals, and Personal Protective Equipment.
- Shipping delays due to availability of material or manufacture/warehouse staff.
- Cost of COVID-19 items in general. Price increases due to demands.
- 95 percent of staff are essential, cannot work from home.
- Shortages in staff at times due to COVID-19 leave/testing requirements.

### **Significant Changes in Results to be Delivered in FY2023**

Facilities continues to play a larger role in information technology management for the airport. This is helping to streamline processes and increase service levels as well as efficacy of implementation and adoption of new technology.

### **Statutory and Regulatory Authority**

AS 02 Aeronautics  
AS 44 State Government  
AS 18 Health and Safety
