**Brief Summary and Statement of Need:**

The goal of this project is to update the local transportation model and Environmental Protection Agency (EPA) mobile source emission model. Fairbanks is a newly designated particulate matter (PM) 2.5 non-attainment area and a carbon dioxide (CO) maintenance area. An up-to-date transportation model and EPA mobile source emission model are needed for ongoing transportation and air quality planning activities in the community.

This project will provide funding to conduct federally mandated Air Quality Conformity Analysis for all long range and short-term planning documentation.
