

State of Alaska
FY2024 Governor's Operating Budget

Department of Transportation/Public Facilities
Division of Facilities Services
Results Delivery Unit Budget Summary

Division of Facilities Services Results Delivery Unit**Contribution to Department's Mission**

Delivers, improves, and maintains safe and reliable facilities across Alaska.

Core Services

- Leadership and facilitation of State Facilities Council including executive branch departments, courts, and the university.
- Collaboration with Office of Management and Budget to develop statewide deferred maintenance prioritization strategy and process.
- Provide project management and engineering oversight for all vertical construction capital projects through Statewide Public Facilities, including deferred maintenance, federal, state airport, and energy efficiency programs.
- Perform or procure contracts for construction, remodels, or major repairs of state-owned facilities.
- Collaboration with executive branch departments to educate, guide, and operationalize best practices of facilities maintenance, including Department of Transportation and Public Facilities (DOT&PF) executed and delegated facilities construction projects.
- Provide for the maintenance and operations of state-owned facilities within Division of Facilities (DFS) portfolio.
- Procure, manage, and administer leased office and other types of space from the private sector and state property owners of the executive branch.
- Provide space planning standard recommendations and contract guidance for all state-owned office facilities.
- Provide for the day-to-day long-term management of 11 Public Building Fund (PBF) facilities and six Non-PBF buildings.
- Oversee rate development and budgeting for all PBF and Non-PBF facilities and lease administration.

Major RDU Accomplishments in 2022

- Executed Service Level Agreements internally with DOT&PF, and externally with the following departments: Education and Early Development, Health, Public Safety, Labor and Workforce Development, Natural Resources, and Alaska Courts.
- Continued onboarding of further departments, buildings, and functions for Service Level Agreement participation based on willing participation.
- Major portions of the statewide enterprise CMMS have been implemented, with maintenance work orders live as of July 2020.
- Continued development of division-level policies and procedures. Successfully transitioned five components to include the Public Building Fund and Leasing group from the Department of Administration to Division of Facilities Services.
- Performed energy savings projects at the Department of Environmental Conservation Health Lab, Father Andrew P. Kashevaroff (APK) Museum, and Anchorage area street lighting.
- Continued to reduce agency lease costs by reconfiguring existing space to increase efficiency or relocating agencies into more efficient space.
- Produced reductions in lease cost through AS 36.30.083 extensions, assertive negotiations, and utilization of the request for proposal and the single source waiver process to obtain the most cost-efficient lease possible.
- Identified opportunities and accomplished several moves that moved state agencies from a private lease into state-owned facilities to reduce lease costs.
- Collaborated with state agencies to address security concerns in a cost-effective and timely manner.
- Continued to work cooperatively with agencies to ensure space is utilized in the most effective and efficient manner as the state strives to reduce the amount of leased space necessary for state agencies.
- Identified and implemented several agency collocation opportunities and reductions of square footage in several leases to maximize space efficiency and lease cost savings.
- Engaged in negotiations with a more assertive approach which resulted in a lease reduction cost for multiple agencies.

Key RDU Challenges

- DFS will continue to identify and manage the challenges with transitioning from a component to a Result Delivery Unit in FY2022.
- Refine statewide processes and practices, with a focus on normalizing facility maintenance across all buildings in the DFS portfolio as each department has historically maintained its facilities very differently.
- **Chargeback Rates Transition** - Work towards one consolidated SLA facility maintenance and PBF rates process and methodology.
- **Space Efficiency** - Anticipate and skillfully respond to the fluctuating needs of agency occupancy. This may include expansion of certain leases or reconfiguration of currently occupied space, reduction of agency footprint when possible, or agency relocation from private leases into state-owned facilities.
- **Space/Cost Reduction** - Continued effort to discuss space reduction options available to agencies as we evolve into more of a telework environment. Apply cost reduction strategies to equitably decrease the cost of lease space required by state agencies. Continue the ongoing task of designing, planning, and constructing in space to facilitate the needs of the state agencies.
- **Contract Management** - Lease compliance to ensure renovation, insurance and all other pertinent clauses are enforced. As needed, staff will also meet with state occupants to ensure they are informed of all cure issues and concerns related to their specific lease.
- **Security Concerns** - Security concerns are increasing statewide and are particularly prevalent in the Anchorage area. We are currently working with agencies and lessors to address these concerns where possible. Increased need for security in the Anchorage area may result in increased associated costs.
- **Database and Reporting** - Utilize an interim tracking system until implementation of the computerized maintenance management system.
- **COVID-19 Mitigation** - Due to the COVID-19 pandemic, all buildings have had modifications made to air intake, HVAC filters, and janitorial. Additionally, changes may need to occur to space management to either accommodate for additional space between employees and/or reduction of space due to telework options.

Significant Changes in Results to be Delivered in FY2024

- As DFS matures, analysis and organizational design will be ongoing to refine the structure of the division in order to accomplish the mission.
- Identify one consistent occupancy rate methodology across all types of state-owned and occupied buildings.
