

**Alaska Energy Authority - Statewide Grid Resilience and Reliability - IIJA Formula**

**FY2025 Request: \$19,443,597**  
**Reference No: AMD 65128**

**AP/AL:** Appropriation  
**Category:** Development  
**Location:** Statewide  
**Impact House District:** Statewide (HD 1 - 40)  
**Estimated Project Dates:** 07/01/2024 - 06/30/2029

**Project Type:** Energy  
**Recipient:** NA  
**House District:** Statewide (HD 1 - 40)  
**Contact:** Curtis W. Thayer  
**Contact Phone:** (907)771-3000

**Brief Summary and Statement of Need:**

In support of the Infrastructure Investment and Jobs Act (IIJA) and the Building a Better Grid Initiative, the Department of Energy (DOE) developed a \$2.3 billion formula grant program to strengthen and modernize America's power grid against wildfires, extreme weather, and other natural disasters. Section 40101(d) of the IIJA established a formula grant program (Program) providing \$459 million annually over a period of five years to states and Indian Tribes to improve the resilience of the electric grid against disruptive events. Alaska was awarded \$17,627,018 in FY2025 and anticipates the remainder of the funding split equally for FY2026 and FY2027.

<b>Funding:</b>	<u>FY2025</u>	<u>FY2026</u>	<u>FY2027</u>	<u>FY2028</u>	<u>FY2029</u>	<u>FY2030</u>	<u>Total</u>

**Prior Funding History / Additional Information:**

Sec14 Ch1 SLA2023 P83 L13 HB39 \$13,927,102  
 Sec35 Ch11 SLA2022 P144 L1 HB281 \$3,633,158  
 Sec11 Ch11 SLA2022 P85 L10 HB281 \$12,110,523

**Project Description/Justification:**

The Alaska Energy Authority (AEA) is the sole state entity for the State of Alaska to apply for, receive, and administer the IIJA Section 40101(d) federal funds. This request is for the State allocation only and does not include funds allocated to Tribes.

The objective of this program is to improve the resilience of the electric grid against disruptive events. Per IIJA section 40101(a)(1), a disruptive event is “an event in which operations of the electric grid are disrupted, preventively shut off, or cannot operate safely due to extreme weather, wildfire, or a natural disaster.” To achieve this objective, funding provided by DOE under the program may be used to implement a wide range of resilience measures intended to mitigate the impact of disruptive events,

including:

- a) weatherization technologies and equipment;
- b) fire-resistant technologies and fire prevention systems;
- c) monitoring and control technologies;
- d) the undergrounding of electrical equipment;
- e) utility pole management;
- f) the relocation of power lines or the reconductoring of power lines with low-sag, advanced conductors;
- g) vegetation and fuel-load management;
- h) the use or construction of distributed energy resources for enhancing system adaptive capacity during disruptive events, including:
  - a. microgrids; and
  - b. battery-storage subcomponents;
- i) adaptive protection technologies;
- j) advanced modeling technologies;
- k) hardening of power lines, facilities, substations, of other systems; and
- l) the replacement of old overhead conductors and underground cables.

Funding may also be used for the training, recruitment, retention, and retraining of skilled and properly credentialed workers in order to perform the work required for the resilience measures listed above.

Resilience measures that are not allowed under Section 40101(d) include:

- 1. Construction of a new
  - a. Electric generating facility; or
  - b. Large-scale battery-storage facility that is not used for enhancing system adaptive capacity during disruptive events; or
- 2. Cybersecurity.

In August of 2023, AEA was awarded \$22,174,492 via the Grid Resilience State and Tribal Formula Grants program. That funding represents the allocation for the first two years of the five-year formula allocation for the State of Alaska. AEA will hold a competitive selection process to issue subawards for this funding for the purpose of implementing eligible resilience measures that achieve the objectives of Section 40101(d), eligible entities include:

- a) an electric grid operator;
- b) an electricity storage operator;
- c) an electricity generator;
- d) a transmission owner or operator;
- e) a distribution provider;
- f) a fuel supplier, and
- g) any other relevant entity, as determined by the Secretary (of DOE).

AEA was awarded \$17,627,018 in FY2025 and anticipates the remainder of the funding split equally for FY2026 and FY2027.
