Prior Funding History / Additional Information:

From 1993-2015, the Airborne Geophysical/Geological Mineral Inventory (AGGMI) program annually produced geophysical surveys, geologic maps, and datasets to attract industry exploration investment and facilitate resource development. This program will produce geological and geophysical maps of high-potential mineral areas in Alaska, focused on critical minerals. The published new data and digitally upgraded historical data will spur private sector investment in Alaska, generate jobs, and help the nation's critical mineral supply.
