Project Description/Justification:

Grant funds for research, monitoring and testing of energy efficiency designs, products, and construction technology in Alaska’s homes and public facilities. Program results inform the operation and improvement of a variety of energy-efficiency incentive programs operated by the State of Alaska and the Alaska Housing Finance Corporation (AHFC). AHFC works with other agencies to maximize this resource while determining the best, most cost-effective energy efficiency practices, techniques, and materials across Alaska’s climate varied regions.

Projected Outcomes

- Data collection on energy-efficient design of homes in Alaska’s diverse climates;
- Evidence-based research on energy efficiency features and their impact on home-energy consumption, comfort levels, durability, occupant health, and household economics; and,
- Dissemination of energy information to the building industry and public.
