Brief Summary and Statement of Need:

Establish an area in the Anchorage Armory as a classified workspace with Intrusion Detection System and a solid core door with combo that complies with Army Regulation 380-67. This space will allow the DMVA significantly increased space to access classified materials with the ability for multiple personnel to work on planning in a collaborative environment. Without approval, this will limit ability to access critical sensitive information necessary for the planning and execution of State and federal missions. This is becoming increasingly more important given the strategic location of Alaska.
