Dear Ms. Clark and Ms. Jones,

Attached is the full list of publications each State agency is required to produce according to Alaska statutes. This list is being provided to your offices electronically in accordance with AS 44.99.220 with the passage of House Bill 187 during the 2022 legislative session.

This list notes the cost to produce certain publications but does not account for the cost of staff time to produce each report. Those costs are absorbed through personal services as part of the position duties and responsibilities. Additionally, every report that is still being produced is available electronically, as they are all complied in electronic format, but in many cases, reports are not required to be posted on a website or printed in hard copy format. It is noted where the statutory requirement is to print a physical copy.

We have identified 288 publications produced by State agencies, of which, 48 are being proposed for elimination due to outdated statutes, boards being sunset, one-time report requirements being met, etc. Additionally, 11 are proposed to be changed due to a variety of reasons including data changes, department structure changes, and newspaper print requirements. We look forward to working with the Legislature to update Alaska statutes to more accurately reflect the changes that have transpired with technological advancements and data collection over the last several decades.

Sincerely,

Lacey Sanders
